

Affairs System User Manual

Overview

The Affairs system manages the company's leases and licences, and is where the affairs team finds new store locations and maintains relationships with landlords and authorities. Open it from the office Company Portal via "Affairs" (URL /affairs). There are six tabs at the top.

Tab	What it does
Documents & Contracts	Store leases, hygiene certificates, company licences, patent certificates and vendor contracts, with automatic expiry and payment reminders
Site development	Candidate locations, tracking site visits, negotiation, applications and qualification reviews, with a location market analysis
Relationships	Contacts at landlords, malls, the public sector and the private sector, with traits and interaction history
Rent benchmarks	Shop rents by area and how they change, with AI rent search
Affairs AI assistant	Ask about finding shops, application processes, negotiation and relationships; it looks things up online when needed
Notification Channels & Reminder Days	Notification channels and reminder days for Affairs, General Affairs, Cashier and the GM office

Access

1. Only members of the Affairs unit and company managers (owner, IT administrator) can open it; anyone else sees a message that Affairs is restricted.
2. Data belongs to the company, so everyone with access in the same company sees the same records.
3. Switch between Traditional Chinese, English and Vietnamese at the top right; AI replies use the language you pick.

Documents & Contracts

All leases and licences are recorded here, and the system sends reminders based on expiry and payment dates.

Amounts in the list show their currency, for example "Monthly Rent: 20,000,000 VND". Edit any document marked in orange "Currency not set" and add its currency.

Expiry and payment reminders

Reminder	Default timing	Sent to
Expiry stage 1 (negotiate)	30 days before expiry	Affairs, General Affairs
Expiry stage 2 (follow up)	15 days before expiry	Affairs, General Affairs
Expiry stage 3 (urgent)	7 days before expiry	Affairs, General Affairs, GM office
Payment, first	3 days before payment day	Cashier
Payment, second	1 day before payment day	Cashier

- Each document can override these days under its custom reminder settings.
- For a location that has already renewed, tick the "renewed" box so the GM office no longer gets urgent alerts.
- "Contracts/Certificates Expiring Soon" above the list shows documents that are about to expire or overdue.

Site development

Record every location you might open as a "site" and track it from discovery to signing.

All

Street store

Mall

Public sector

Private sector

All statuses

+ New site

Public and private sites require an application and qualification review; track the steps and deadline inside each site. Delivery-only stores can use second floors or weaker locations to keep rent low.

No sites yet. Click "New site" to start.

Category	Types	Notes
Street store	Large ground-floor store, small ground-floor store, shop-in-shop, storefront counter, delivery-only store	Delivery-only stores can use second floors or weaker locations to keep rent low
Mall	Community mall, non-community mall	Fill in households for community malls
Public sector	Airport, government development zone, other public body	Requires an application and qualification review
Private sector	Inside a factory, private market, other private body	Requires an application and qualification review

Status: Prospect → Site visit → Negotiating → Applying → Under review → Approved → Signed; a site can also be marked Rejected or Dropped.

Add a site

1. Click "New site" and fill in the name, category, type, address and area.
2. Add floor, area, frontage, monthly rent and deposit from the visit; for malls, the number of households.
3. Under "Contact", pick the landlord or manager (create them in Relationships first).

4. Public and private sites get an "Application & qualification review" block: set the deadline, click "Use template" for the standard steps, give each step a due date and tick it when done.
5. Click "Save". The card shows application progress (for example Application 2/6) and the deadline.

Public sector template: get the tender or selection notice and eligibility rules → prepare qualification documents → submit application / bid → qualification review → presentation / selection → sign and move in. Private sector: contact the operator → submit proposal and qualification documents → review and negotiate → trial run / sign.

The screenshot shows the IMT ERP interface. The main form is titled "Application & qualification review" and includes the following fields and sections:

- Area:** Text input with example "e.g. Da'an District, District 1".
- Floor:** Text input.
- Area (m²):** Text input.
- Frontage (m):** Text input.
- Monthly rent:** Text input.
- Deposit:** Text input.
- Contact (landlord / manager):** Dropdown menu.
- Application deadline:** Text input with format "mm/dd/yyyy" and a calendar icon.
- Application steps:** A list of six steps, each with a checkbox, a text input, and a date input:
 - ☐ Get the tender or selection notice and eligibility rules
 - ☐ Prepare qualification documents (licences, financials, track record)
 - ☐ Submit application / bid
 - ☐ Qualification review
 - ☐ Presentation / selection
 - ☐ Sign and move in
- Add step:** Button.
- Notes:** Text area.
- Buttons:** "Cancel" and "Save".

Location market analysis

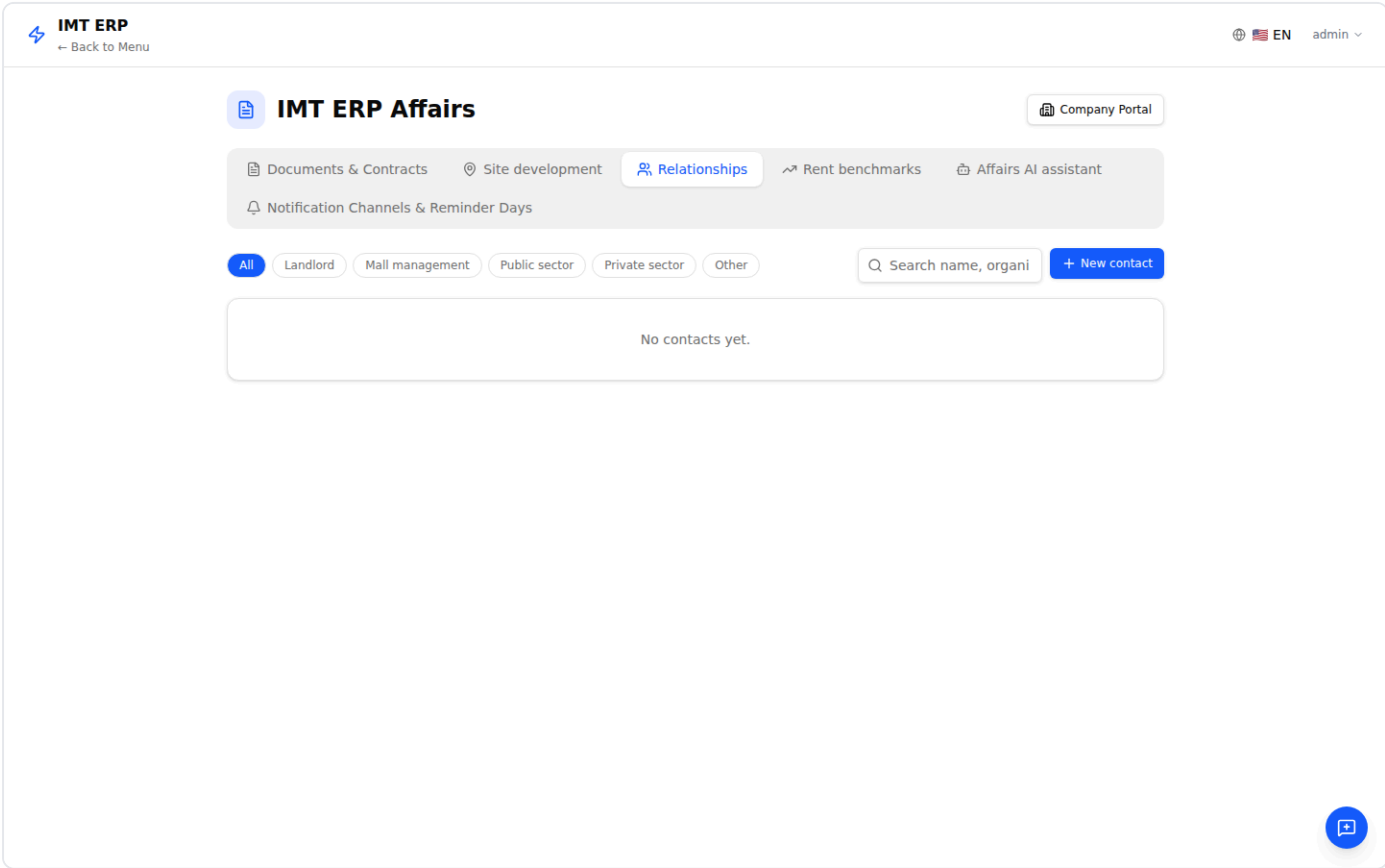

On a site card, click "Market analysis", choose a radius (500–3,000 m) and click "Run analysis". AI searches public data for the address and finishes in about 1–3 minutes. The result is saved on the site:

- Suitability score (recommended / consider / not recommended) and summary
- Residents in the radius, density, resident mix, monthly income per capita
- Schools (type, students, distance) and large housing estates (households, distance)
- Foot traffic and peak hours, vehicle traffic, storefront visibility, competitors, area rent comparison
- Opportunities, risks and source links

Figures that can't be found are left blank or marked as estimates. Visit the site before deciding.

Relationships

Record everyone the affairs team needs to keep in touch with, along with their traits and every interaction, so nothing is lost when staff change.

Category	Includes
Landlord	Landlords of stores and candidate sites
Mall management	Leasing, operations, property management
Public sector	Investment department, health / food safety, market police, economic police, tax office, fire department, environment, labour office, customs, airport, government development zone, other public body
Private sector	Factory contact, market management, other private body
Other	Anyone not covered above

Add a contact

1. Click "New contact" and choose a category; for public and private sector, also choose the department type.
2. Fill in name, title, organisation, phone, email, messaging app (LINE / Zalo / WeChat), area and related store code.
3. Set importance from 1 to 5 stars.
4. Under "Personal traits", note personality, preferences, communication style, taboos, decision habits and important dates.
5. Set a "Next follow-up date". When it is due, a reminder appears at the top of the tab; click the name to open the contact.

New contact X

Category: Public sector Department type: Investment department Importance: ★★★

Name: Title: Organisation:

Phone: Email: Messaging app: LINE / Zalo / WeChat

Area: Next follow-up date: mm/dd/yyyy Related store code:

Personal traits: Personality, preferences, communication style, taboos, decision habits, important dates...

Notes:

Close Save

Interaction log

Open an existing contact to see the "Interaction log". Choose the date and type (visit, call, meal, gift, meeting, message, other), write what was discussed and the next step, then click "Add entry". The contact's "Last contact" date updates automatically.

Rent benchmarks

Build up shop rent records by area. The system calculates monthly rent per square metre and its change by month, so you have numbers to compare when negotiating.

—

Search rents

Enter by hand

- Under "Add rent record", fill in the area (type a new name for a new area), address, type, size, monthly rent, currency and date.
- Optionally pick the landlord (from Relationships) and add notes.
- Click "Add".

Area in m² is required to calculate rent per m².

Change analysis

Choose an area at the top to see the number of records, average monthly rent per m², the change since the first month (red for rising, green for falling) and a monthly rent chart. The chart needs at least two months of records with area filled in.

AI rent search

- Under "AI rent search", enter the area, address (optional) and type, then click "Search rents". It takes about 1–2 minutes.
- AI searches shop listings and rent reports and gives the typical rent per m², the trend (rising / flat / falling), recent changes and negotiation tips.
- Listings it finds are shown with their original links. Tick the ones you want and click "Save N to ..." to add them to that area, marked as AI.

AI lists only listings it actually found. Open the links and check them before saving.

Affairs AI assistant and notification settings

Affairs AI assistant

Answers affairs questions: how to find well-priced, well-located shops and channels; application processes, eligibility and responsible authorities for public and private sites; negotiating with landlords; and maintaining relationships with each department.

The screenshot shows the IMT ERP web application. At the top left is the 'IMT ERP' logo with a 'Back to Menu' link. At the top right are language and user settings: 'EN' and 'admin'. Below the header is a navigation bar with a 'Company Portal' button and a menu containing 'Documents & Contracts', 'Site development', 'Relationships', 'Rent benchmarks', and 'Affairs AI assistant' (which is highlighted). Below the navigation bar is a section titled 'Affairs AI assistant' with a description: 'Finds well-priced, well-located shops, explains public and private application processes and channels, and advises on relationships. Looks things up online and cites sources when needed.' Below this description are six sample questions in a grid: 'How do I find shops with low rent but good locations? Which channels should I use?', 'What is the application process, eligibility and responsible authority for airport retail spaces?', 'How do I approach a factory and apply to open a kiosk inside it?', 'What negotiation tactics help lower the rent when renewing with a landlord?', 'Which government departments does a bubble-tea shop deal with, and what does each need?', and 'How do entry terms differ between community and non-community malls?'. At the bottom of the grid is a text input field with the placeholder 'Type a question. Enter to send, Shift+Enter for a new line' and a 'Send' button. A small chat icon is visible in the bottom right corner of the page.

1. Click one of the six sample questions or type your own. Enter sends, Shift+Enter adds a new line.
2. For information that changes, such as regulations, application processes and rents, AI checks online first and lists its sources under the reply.
3. AI takes the company's current sites and contact categories into account, so you can ask things like "which site should we negotiate first?".
4. The conversation stays in this browser tab only; click "Clear chat" to start over.

Notification channels and reminder days

Role	Notifications
Affairs	Expiry stage 1 (30 days) and stage 2 (15 days) to negotiate renewal, and the stage 3 urgent alert
General Affairs	The same three expiry stages as Affairs
Cashier	Lease payment reminders 3 days and 1 day before the payment day
GM office	Top-level urgent alert one week (7 days) before expiry if still not renewed

1. For each role, enter Telegram, email and Zalo (Zalo User ID); you can use several channels at once. Zalo needs the Zalo OA Access Token set up first under the customer service channel settings.
2. Change the default days for lease payments and the three expiry stages under "Global Default Reminder Days"; individual documents can still override them.
3. Click "Save Notification Settings".
4. The system checks automatically every day. When you need it now, click "Check & Send Reminders Now"; reminders already sent are not repeated.

FAQ and notes

Can't open the Affairs system? Your account must belong to the Affairs unit, or be the company owner or IT administrator. Ask an administrator to add Affairs to your units.

Not getting expiry or payment reminders? Check that the role has Telegram, email or Zalo filled in under notification settings. Then check that the document has an expiry date, and that leases have a payment day and payment cycle. The system checks once a day.

Still getting urgent alerts after renewing? Edit the document and tick the "renewed" box, or change the expiry date to the new contract's date.

AI-extracted contract data is wrong? Use a clear, straight scan. Always check amounts, currency and dates by hand before saving.

The contract isn't in the default currency? Edit the document and change "Contract currency" to the one on the contract. Each contract keeps its own currency; nothing is converted between currencies.

Can I use the market analysis or rent search figures directly? Not as the sole basis for a decision. AI compiles public data that may be incomplete or out of date. Open the sources to check them, and visit the site to judge foot traffic, vehicle traffic and the storefront yourself.

How do I start a public sector application? Ask the Affairs AI assistant for the responsible authority and process for that location, create a site in Site development using the public sector template, and add the officer in charge to Relationships with a follow-up date.

Who can see contact details? Everyone in the company with Affairs access. Record only work-related traits; never record ID numbers or other sensitive personal data.
