

Marketing Department System User Manual

Overview

Marketing work is split across two entry points. Both use the same account and share the same data. Day-to-day operations and campaign management live in office; content production and distribution live in marketing.

Entry point	URL	Main use	For
IMT ERP Marketing	Marketing department on office.im-tourist.com (/mkt)	Company and product data, campaign planning, member CRM, delivery platforms, analytics, content calendar	Marketing managers, store marketing, planners
Marketing Center	marketing.im-tourist.com	AI images and video, social posting, marketing automation, lead generation, marketing log	Social media editors, designers, business development

Sign-in and permissions

1. Sign in to either URL with the account your company gave you. Both sites share the sign-in session.
2. Your account needs the "Marketing" module enabled. If you can't see a page or are sent back to the main menu, ask an administrator to enable it.
3. You can switch between the two: on the office marketing page, use "Open Marketing Center" at the top right; in the Marketing Center, use "ERP Marketing" at the bottom of the left menu.
4. Switch between Traditional Chinese, English and Vietnamese at the top right of the screen.

office Marketing (IMT ERP Marketing)

On office.im-tourist.com, click "Marketing". There are 8 tabs at the top. New staff should read "Company profile" first: every AI output draws on the brand and product data stored there.

Company address

Website, target audience, selling points and brand story go in the Brand tab; products and stores have their own tabs.

 Save basic info

- **Brand & Official Channels:** brand name, slogan, brand colors, fonts, logo, website and Facebook / LINE / Zalo / Google Business links. Brand voice, target audience, selling points, brand story and banned words directly shape the copy AI writes.
- **Store Assets:** store names and codes sync from OFFICE unit data. Here you only add the cover photo, interior photos, store story, opening hours, Google Maps and delivery links.
- **Product Assets:** each product's cut-out image, slogan, taste description and flavor notes. The system flags products that exist in R&D recipes and POS but have no marketing assets yet. New products pushed from R&D also get their VIP early-access period and general launch date set here.

 Analytics

 Content Calendar

 **One-Click Generate Full Content Set**

Enter a topic/new product; AI generates platform copy + short video script + image prompt + GEO article per brand guidelines, entering "Pending Review" — published only after approval.

Topic / New Product *

Additional Notes Selling points, promotions, discounts, etc.

Output Channels

Facebook

Instagram

TikTok

Zalo

LINE

 **AI Generate Full Set**

No content generated yet

1. Fill in "Topic / new product" (required) and extra notes (selling points, offers).
2. Tick the platforms: Facebook, Instagram, TikTok, Zalo, LINE.
3. AI produces copy for each platform, a short-video script, image prompts and a GEO article, with status "Pending Review".
4. Content is published only after a manager approves it, and is then added to the "Content Calendar" automatically.

Campaign Center (AI / results)

The screenshot shows the IMT Marketing Campaign Center (AI / results) interface. At the top, there's a header with the IMT Marketing logo, a "Back to Menu" link, and user information (EN, admin). Below the header, there are several navigation buttons: "IMT ERP Marketing", "Visual Styles & Ads", "Open Marketing Center (marketing.im-tourist.com)", "Marketing Log", "User manual", and a download icon. A prominent message states: "Marketing department subdomain **marketing.im-tourist.com** : includes marketing pipeline, AI visual workshop, and lead outreach. [Go to Marketing Center](#)". Below this, there's a row of navigation links: "Company profile", "One-Click Generate", "Campaign Center (AI / results)" (which is highlighted), and "Member CRM & VIP". Underneath, there are more links: "Delivery Platforms", "Analytics", and "Content Calendar". A summary section displays three key metrics: "Active campaigns" (0), "Total budget" (\$0), and "Total campaigns" (0). Below the metrics, there's a section for "iPOS sales database" with a note "No iPOS data yet" and an "Import iPOS report" button. At the bottom, there are filters for "All channels" and "All statuses", along with "AI planner" and "New campaign" buttons. A large empty box with a star icon and the text "No campaigns yet" is shown, with a note: "Click 'AI planner' above to have AI design a high-converting campaign for you." A chat icon is visible in the bottom right corner.

All marketing campaigns are created here, including what used to be "Offline Marketing". There are three channels: Offline (store / pop-up), Online (social / delivery) and Hybrid (OMO).

1. To have AI plan it: click "AI planner", enter the campaign topic, budget and extra requirements. AI produces a theme, offer mechanics, store talking points and a checklist. If you're happy with it, click "Use this plan and save".
2. To create one yourself: click "New campaign" and fill in name, channel, category, stores, dates, budget, actual spend, partners and on-site photos.
3. Categories: store materials, street / pop-up event, outdoor ads, cross-industry partnership, social promotion, delivery promotion, VIP member exclusive.
4. Results: first click "Import iPOS report" and upload the daily revenue report or product sales detail exported from iPOS (.xlsx / .xls / .csv). Open a campaign to see revenue during the campaign, comparison with the previous period (PoP) and the same period last year (YoY), ROI, and the after-effect 7 to 14 days after it ends. Re-importing the same store and date updates the data instead of adding to it.

+ Add Listing

No delivery platform listing data yet

💬

For every store on every delivery platform: listing status, store link, commission rate, rating, ranking, orders and revenue this month, and running promotions. Update the numbers once a month so that analytics stay accurate.

Analytics

Summarizes delivery revenue, total marketing spend (campaigns + ads), delivery share of revenue and content output. Click "Weekly Report" or "Monthly Report" and AI writes an analysis with recommended actions based on this data.

Content Calendar

Schedule the platform and date for each post. Statuses go Idea → Draft → Pending Review → Scheduled → Published. Content approved in "One-Click Generate" appears here automatically with status "Scheduled".

Marketing Center: Create

The "Create" group in the left menu has five tools. All of them automatically use the brand and product information from "Company profile".

Visual Styles & Ads (/marketing/templates)

No prompts to memorize: pick a look and get an image or a short-video script.

1. At the top, switch between "Image style templates" (85 styles) and "Short video & ad scripts" (185 storyboards).
2. Search by keyword, for example clay, Black Friday, free shipping, discount, holiday.
3. Click a sample image to enlarge it and see its parameters and recommended ratio, then click "Use this style →".
4. In "Generation settings", fill in the product and key message. You can upload a reference image (JPG, PNG, WebP).
5. Generate the image. Video requires the PRO plan or higher and takes about 30–60 seconds after submitting; if it times out, check AI Visual Studio later.

AI Visual Studio (/marketing/ai-studio)

The screenshot displays the IMT Marketing AI Visual Studio interface. The top navigation bar includes the IMT Marketing logo, a language selector (EN), and a user profile (admin@feelingteonline.com). The left sidebar is divided into sections: MARKETING CENTER, CREATE (with options like Visual Styles & Ads, Product Designer, AI Visual Studio, GEO Content, and AI Experts), DISTRIBUTE (with options like Social Matrix & Warm-up, Marketing Automation, Marketing Pipeline, Prospect Marketing, and Campaigns), TRACK (with Marketing Log), and SETTINGS (with Company Profile, Subscription, and User manual). The main workspace is titled 'Marketing Center / AI Visual Studio' and features a 'Run All' button. A purple banner at the top of the workspace reads: 'Like ComfyUI, chain image and video edits into a visual pipeline — each node does one thing, describe what you want in plain language, and run the whole flow with one click'. The workspace contains two nodes: 'Source Image' (Node #1) and 'AI Edit' (Node #2). The 'Source Image' node has a placeholder for an image and an 'Upload Image' button. The 'AI Edit' node is currently 'Waiting for previous node' and has a text input field for instructions. Below the input field, there is a 'Let AI suggest' button and a detailed instruction-based editing guide. The 'How to use' section in the bottom left of the workspace provides instructions: 'Upload an image, add nodes from the left panel, describe the effect you want in each node, then click "Run All"'. A blue chat icon is located in the bottom right corner of the workspace.

Advanced image editing and image-to-video. Upload an image, then chain processing steps in plain language (edit, style transfer, upscale, background removal, generate video) and run them in one go.

GEO Content (/marketing/geo-writer)

User manual

CROSS-TEAM

GEO Content Writer

Produce articles most likely to be cited by AI engines (ChatGPT / Perplexity / Google AIO / Gemini / Claude)

Material library

GEO tools

Publish settings

Step 1: Topic & exclusive facts

Topic *

e.g. Da Nang private car transfer, Taiwanese business secretary services

Exclusive facts (real pricing / local cases / data — the more specific, the more citable)

e.g. fixed airport transfer NT\$XXX; served 30+ Taiwanese firms in 2024; bilingual local drivers...

Author (E-E-A-T, optional)

e.g. im-tourist Da Nang local team

Tracking target domain (optional, for citation tracking)

e.g. im-tourist.com, marketing.im-tourist.com

Explore questions

Articles written for AI search engines.

1. Enter the topic and the exclusive details only we know (prices, locations, service details).
2. AI finds and groups the high-intent questions customers actually ask.
3. It produces an article that ChatGPT, Perplexity and Google AI Overviews are likely to cite, with JSON-LD structured data ready to paste into the website.

AI Experts (/marketing/experts)

Includes built-in experts and custom experts. A custom expert turns company documents into a dedicated advisor:

1. Click "New expert" and enter a name (e.g. guesthouse regulations advisor), a one-line description and an answer style.
2. Add knowledge sources: URLs, pasted text or uploaded files (PDF, Word, Excel, CSV, TXT).
3. Type your question in "Ask the expert".

Action	Credits
Add a URL source	0.02 per URL + 0.01 per 1,000 characters
Add text or a file	0.01 per 1,000 characters
Ask one question	0.05

Creating and training experts requires the PRO plan or higher; experts that already exist can be asked questions on any plan.

Marketing Center: Distribute

The "Distribute" group in the left menu sends finished content out and brings in new customers.

Social Matrix & Warm-up (/marketing/social-matrix)

Manage multiple Facebook, Instagram, Threads and TikTok accounts across three tabs:

Tab	What it does
Proxy pool	Add your own static IPs or rent official residential IPs (30 days per rental, auto-renewed with credits, released when credits run out)
Account matrix & warm-up	Add social accounts, bind each to a proxy IP and run a 14-day human-like warm-up
Social publishing (Plan A + B)	Enter what you are promoting; the AI social radar finds suitable groups and writes de-duplicated copy

There are two ways to post:

- **Plan A (human Copilot):** click "Plan A: Post manually ↗" next to a group. The system copies the text to your clipboard and opens the posting page; you paste and submit. This is the safest option; use it for new accounts.
- **Plan B (matrix auto-scheduled posting):** only for mature accounts that have reached warm-up Day 12 or later. The system assigns different copy to different accounts and IPs and posts automatically in batches.

Marketing Automation (/marketing-auto)

頁面發生錯誤

請重新整理再試一次。若持續發生，請聯絡我們。

The full flow from data collection, competitor analysis (SWOT), target-audience simulation, copy, images and video to uploading to platforms. Supported platforms include Facebook, Instagram, Threads, LINE OA, Zalo, LinkedIn, Twitter/X, FB Reels, IG Reels, YouTube Shorts and TikTok.

Marketing Pipeline (/marketing-pipeline)

The screenshot displays the 'Marketing Pipeline' interface. On the left, a sidebar contains a 'Back to Marketing Automation' link, an 'Automation Flow' section with a 'Check the steps to run, fully automated in one click' instruction, and a '行銷流水線' (Marketing Pipeline) section. This section lists 10 steps, each with a checkbox, an icon, a title, and a description. Steps 1-10 are: 1. Collect Info (News/web/maps/reviews), 2. Analyze Data (SWOT/competitors/market), 3. Copywriting (Multi-platform marketing co...), 4. Image Script (Visual script generation), 5. Image Output (AI image generation), 6. Video Script (Storyboard generation), 7. Video Output (AI video generation), 8. Upload Platforms (Auto-upload to platforms), 9. Prospect Marketing (Batch phone / email market...), and 10. Anchor Marketing (HeyGen anchor video). Below the list, there are two options: 'Notify and wait for confirmation when done' and 'Continue automatically when done'. On the right, the main area shows the '行銷流水線' (Marketing Pipeline) with a status of '10 steps checked - 1 units of data ready'. It features a 'Schedule' button and a 'Start' button. A large dark blue area contains a lightning bolt icon and the text 'Check steps then click "Start"' and 'All settings are imported from the marketing pipeline campaign'. A small blue button with a plus icon is in the bottom right corner.

Chains the marketing automation steps into one flow that runs on its own:

1. Tick the steps to run on the left.
2. For each step choose "Continue automatically when done" or "Notify and wait for confirmation when done". With notify, the system sends a Telegram message with buttons so you can confirm from your phone.
3. Click "Start".
4. To run it regularly, turn on "Schedule" and choose daily, weekly or monthly and a time. Settings are saved automatically.

Prospect Marketing (/prospect-call)

IMT Marketing

Back to Menu

ENadmin

Prospect Marketing

Auto-collect orgs → AI filter + classify → distance calc → phone calls / email

Phone MarketingEmail MarketingSMS MarketingSchedule

Step 1 — Collection Sources

Search Keywords *

One keyword per line or comma-separated, each searched independently
e.g.
SALES, OFFICE

Multiple keywords are searched separately and merged/deduplicated

Location (optional)

e.g. Tainan City, Hsinchu County

Max per keyword

50

Multiple keywords searched separately and merged; total = limit x keyword count

Channels

Map

Facebook

Instagram

TikTok

YouTube

Threads

Amazon

Shopee

iOS/Android

Web

Run Pipeline

Save progress (continue later)

Step 2 — Filter Criteria

Filter criteria (AI-understood)

e.g. only manufacturing and factories; 50+ employees; exclude small studios

Proactive B2B outreach: the system collects organization lists → AI screens and groups them → calculates distance → makes contact. Tabs: "Phone Marketing", "Email Marketing", "SMS Marketing", "Schedule".

Campaigns (/marketing/campaigns)

The same feature and the same data as the office "Campaign Center"; see the earlier section for how to use it. Offline, online and hybrid campaigns are all created here; the old "Offline Marketing" has been merged in.

Marketing Center: Track & Settings

Marketing Log (/marketing/logbook)

The system automatically records the key points of staff conversations with AI, marketing campaigns, social schedules, copy drafts and delivery progress. Nothing needs to be logged by hand.

- The cards at the top show total entries, staff AI chats, marketing output events, participating staff and credits used.
- Tabs: "All", "AI chat", "Events", "Manual & summaries". Filter by staff member, or search by name, title or content.
- When a meeting reaches a decision, click "New entry" and write down the topic and next steps, e.g. "Summer 2026 iced drinks promotion strategy confirmed".
- Click "AI summary report" for an AI-written report on operations and collaboration for the period; the full text can be copied in one click.
- Viewing requires marketing unit permission.

Company Profile (/marketing/brand)

The same editor and the same data as the "Company profile" tab in office marketing; edit it on either side. All AI tools use and cache this content, so the more complete it is, the more accurate the output.

Subscription (/marketing/plan)

Subscription plans
Choose the plan that fits your needs and upgrade anytime; generation costs are billed separately from prepaid credits

Marketing plan Current: MAX Top up credits →

Yearly (about 20% off) Monthly

CORE
\$29 **\$23.17** USD/month
Save 20%
\$278 USD per year
· 10 marketing projects
· 1 collaborator
· Usage charged at ×1.8 (FREE: ×2)
· All generation charged by usage
Upgrade

PRO
\$49 **\$39.17** USD/month
Save 20%
\$470 USD per year
· Everything in CORE
· Unlimited projects and collaborators
· Usage charged at ×1.6
· Marketing pipeline (fully automated)
· Social matrix + 1 free official posting IP
Upgrade

MAX ✓ Current
\$79 **\$63.17** USD/month
Save 20%
\$758 USD per year
· Everything in PRO
· Usage charged at ×1.4
· Custom enterprise features
Current plan

The plan takes effect right after payment and does not auto-renew; buy again to extend. Generation costs for images, videos, avatar videos, calls and email are charged from credits and are not included in the subscription.

Feature comparison

Feature	Free	CORE	PRO	MAX
Marketing projects	1	10	Unlimited	Unlimited
Collaborators	Cannot invite	1	Unlimited	Unlimited
Usage multiplier (actual cost ×)	×2	×1.8	×1.6	×1.4

Shows your current plan, this month's bonus credit balance and a feature comparison, and lets you top up credits.

- **Internal company accounts (admin, employee):** not limited by plan. They are always treated as the top plan and generation does not use credits. Notices such as "Requires PRO plan or higher" or "Uses X credits" do not apply to staff.
- **External customer accounts (external):** features depend on the plan. Images, video, presenter video, phone calls, email and other generation are charged separately in credits. Monthly bonus credits expire at the end of the month and do not roll over; on the free plan they are granted only after email verification. Payments take effect immediately and plans do not auto-renew.

FAQ and notes

Can't open marketing.im-tourist.com, or get redirected elsewhere? Your account needs the "Marketing" module; Prospect Marketing also accepts the "Leads" module. Ask an administrator to enable it.

Can office and marketing data get out of sync? No. Company profile and Campaign Center read and write the same data on both sides; editing on either side is the same.

Where did "Offline Marketing" go? It has been merged into the "Campaign Center". When creating a campaign, set the channel to "Offline (store / pop-up)". Old links redirect to the Campaign Center automatically.

Video never finishes? It usually takes about 30–60 seconds. If you see "Video generation timed out", check "AI Visual Studio" later. Don't submit again.

Social account notes - Warm up new accounts first. Accounts below Day 12 can't use Plan B auto-posting. - During warm-up, post with Plan A (post manually). - Bind each account to its own proxy IP. After you release a rented IP, accounts bound to it need a new proxy.

AI output inaccurate? First check that the brand, product and store data in "Company profile" is complete and correct. Every AI tool relies on it.

Before publishing Have a person check AI-written copy, prices and offer terms before publishing. Record important decisions in the "Marketing Log".
