HR System User Manual

Overview

The HR system (/hr) keeps staff records from application to leaving: recruitment, attendance, payroll, evaluation, labor contracts, social insurance, the union, the employee roster and leave. Every employee also has their own **employee portal** for payslips, available hours and shifts.

Tab	Purpose
1. Recruitment	Applicant board, public application link, notifications, documents, one-click conversion to employee
2. Attendance	Upload each store's time-clock export, monthly hours per person, manual adjustments
3. Payroll (TPBank)	Monthly payroll, e-payslips, TPBank payroll file
4. Evaluation	Monthly rating, bonus and reward/penalty items, carried into payroll
5. Labor contracts	Bilingual contracts from templates, printing, renewal reminders
6. Social insurance	Enrollment check and status, 5M VND alert, insurance report exports
7. Union system	Members, benefits, collective agreements, union finances
Employee roster	Staff records, units, system accounts, portal links, temp passwords
Leave records	Leave requests, approve / reject
Personnel Data (/personnel)	Each person's details, document submission, missing-document reminders

Access

1. Only members of the HR unit can use the HR system.
2. All amounts are shown in Vietnamese dong (VND).
3. Switch between Traditional Chinese, English and Vietnamese at the top right.

The screenshots in this manual use demo data; names, phone numbers and amounts are not real.

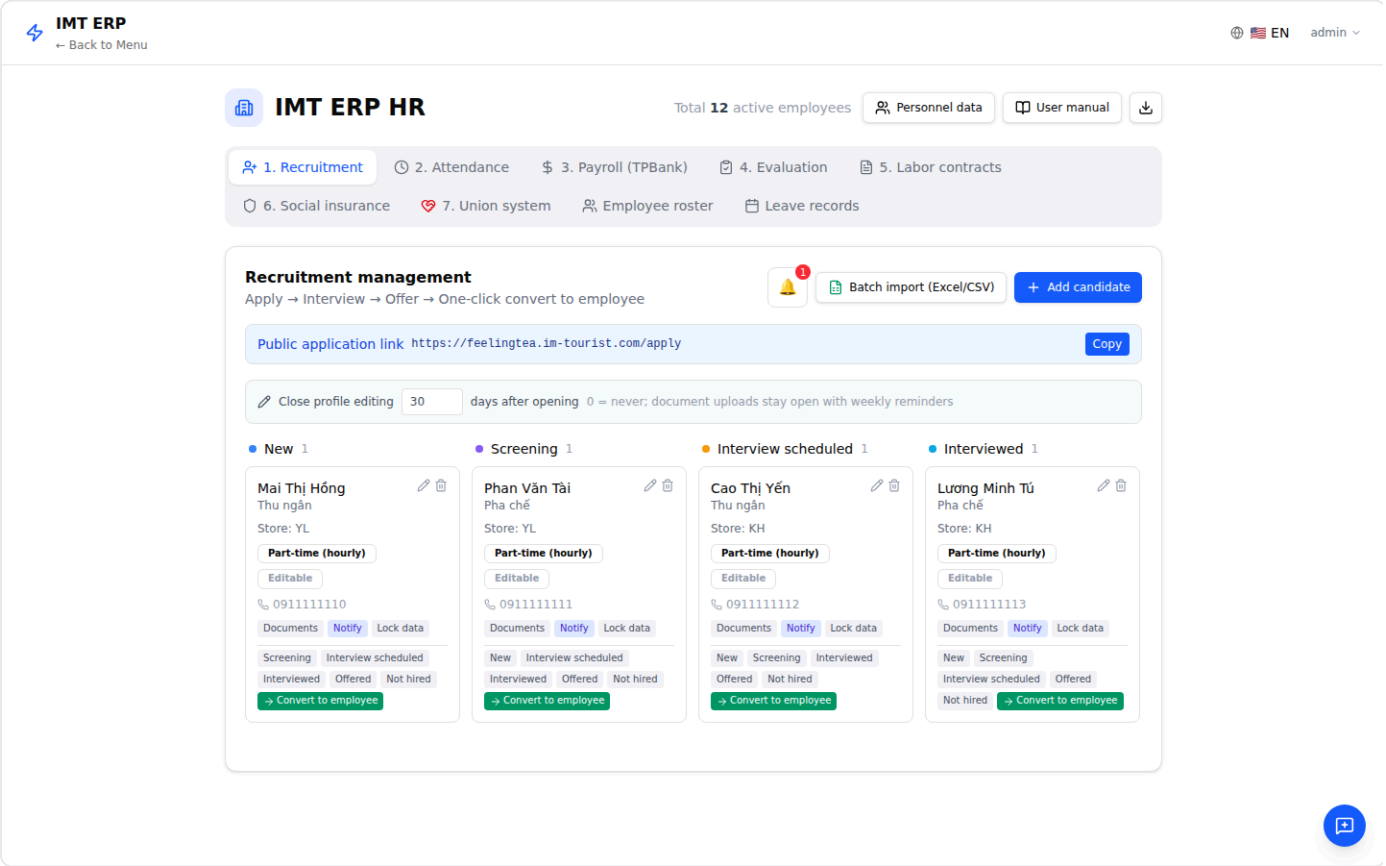

Employees, system accounts and the employee portal

Everyone is first an **employee** in the roster. A system account is an extra permission:

	With system account (store managers, leaders, office staff)	Without account (regular part-time and full-time staff)
Employee roster	✔	✔
Employee portal (payslips, available hours or day-off requests, shifts)	✔ still used	✔ the only tool
Log in to the system for their units (store, shifts, evaluation…)	✔	✘

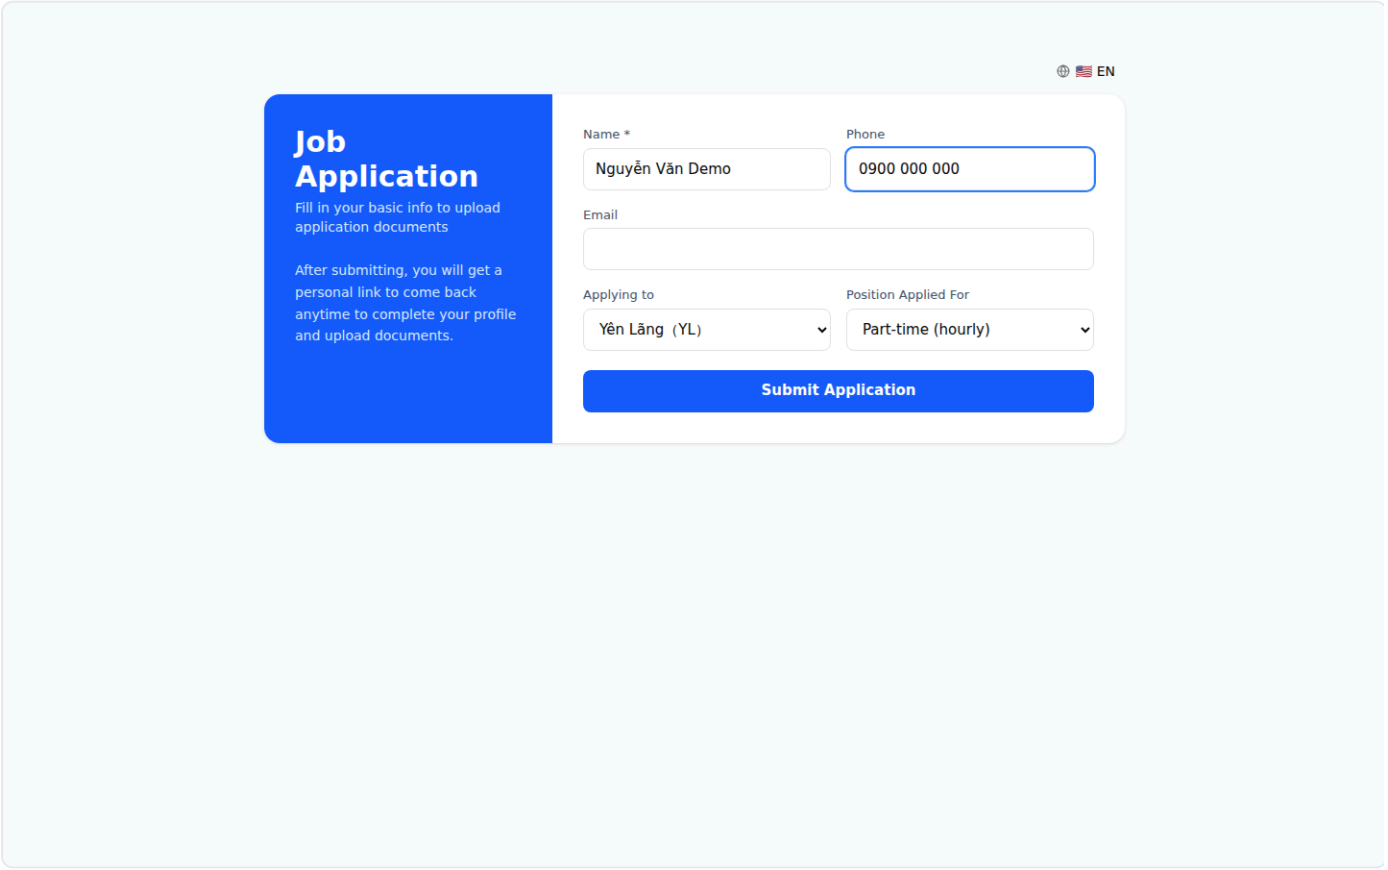

The portal address is "company address /e/attendance number", for example https://feelingtea.im-tourist.com/e/1001. The first login uses the birthday (day-month-year, 8 digits) or a temporary password from HR; after that the employee uses their own password.

1. Recruitment

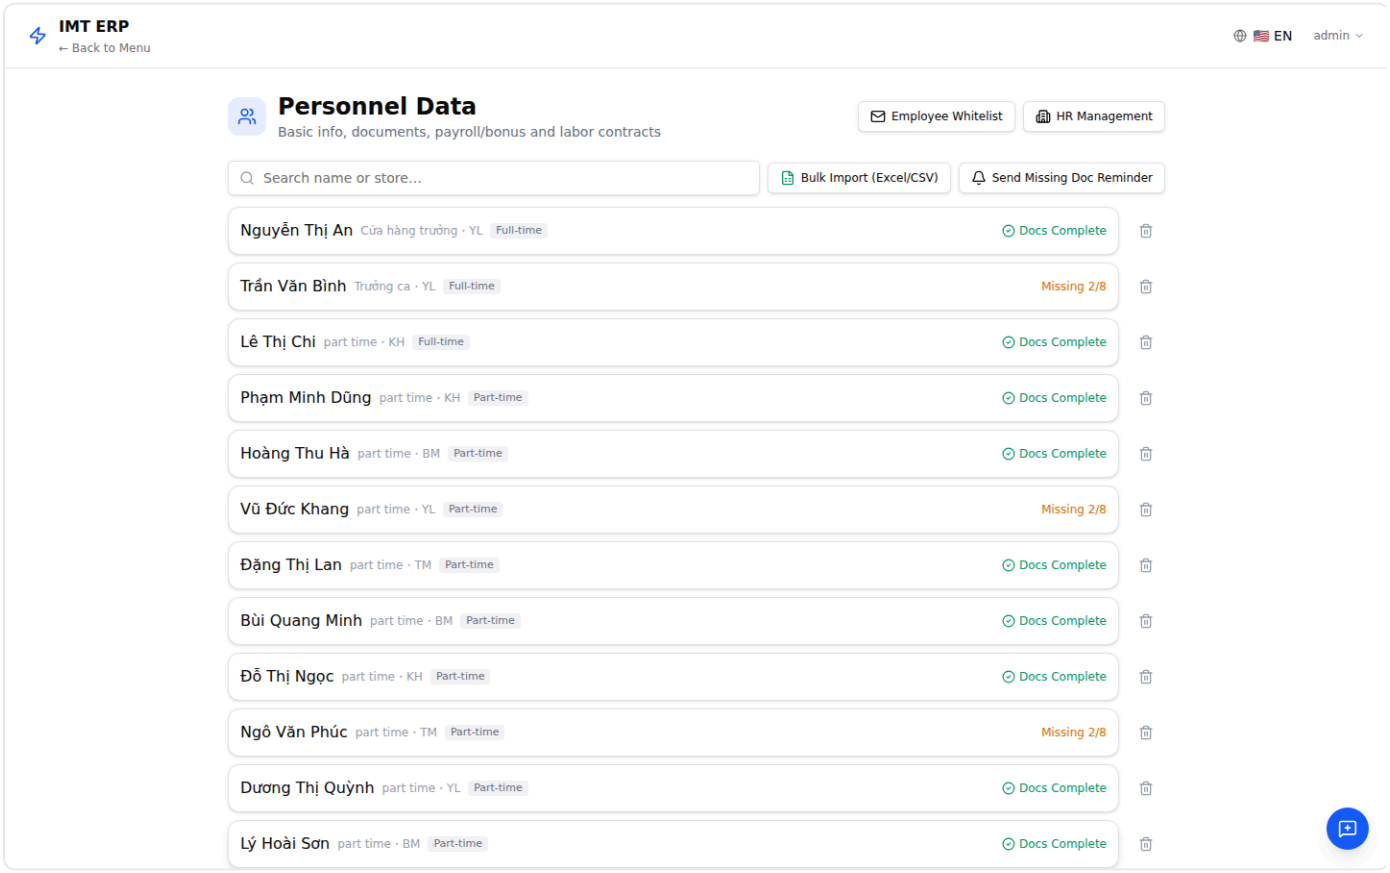

1. Share the "Public application link" with applicants; click "Copy" to paste it into a job post.
2. The board has one column per stage: New → Screening → Interview scheduled → Interviewed → Offered → Converted to employee / Not hired. The buttons on each card change the stage.

3. "Notify" sends a template message by the applicant's chosen channel (Zalo or email): invite to interview, hired and ready to start, missing documents.
4. "Documents" shows uploaded files and submission status; "Lock data" closes profile editing for the applicant (documents can still be uploaded) and "Unlock editing" reopens it. A card showing "Editable until " closes automatically on that date.
5. After hiring, choose the "Hire category" (full-time / part-time) in the edit window, then click "Convert to employee" to create the record in the roster.
6. The bell at the top right shows in-app notifications (e.g. new applicants); "Batch import" creates applicants from Excel / CSV.

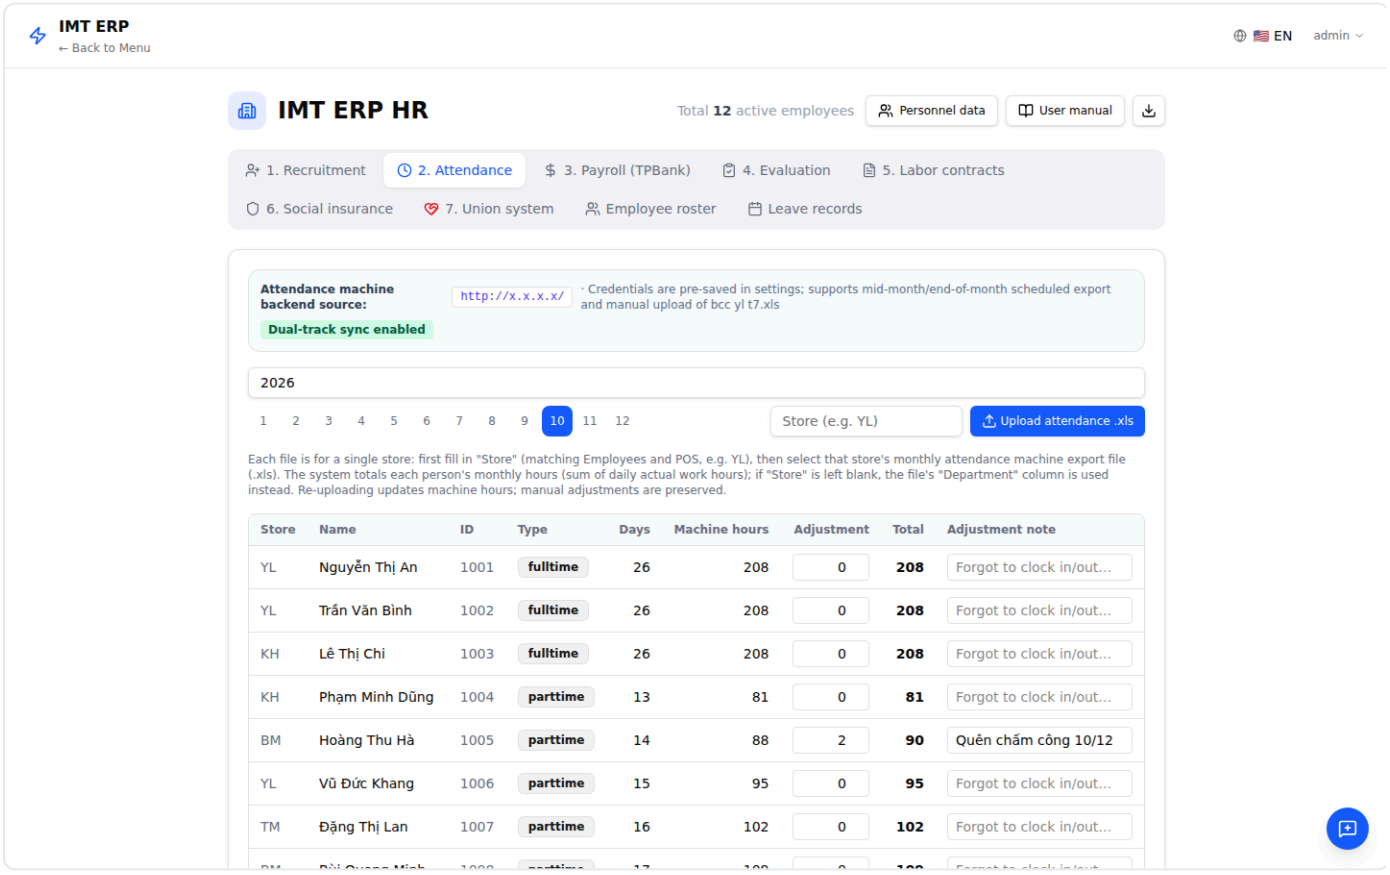

Application form (public apply link): one column on phones, two on desktop. Applicants first choose the unit (a store, Office or Factory) and then the position: stores — Full-time, Part-time (hourly), Store manager, Management trainee, Other; office — R&D, Marketing, Administration, Accounting, Field staff, Engineering, Special assistant, Audit, Other; factory — Management, Administration, Full-time, Part-time. "Other" lets them type the position. Full-time or part-time is set automatically from the position. After submitting, applicants get a personal link to come back and complete their resume (gender, hometown, education, work experience) and upload documents. Once hired, the same record and documents carry over to the employee portal, where staff can keep adding to them; changes to name, phone, email, address, birthday and ID number sync to the employee record.

Personnel Data

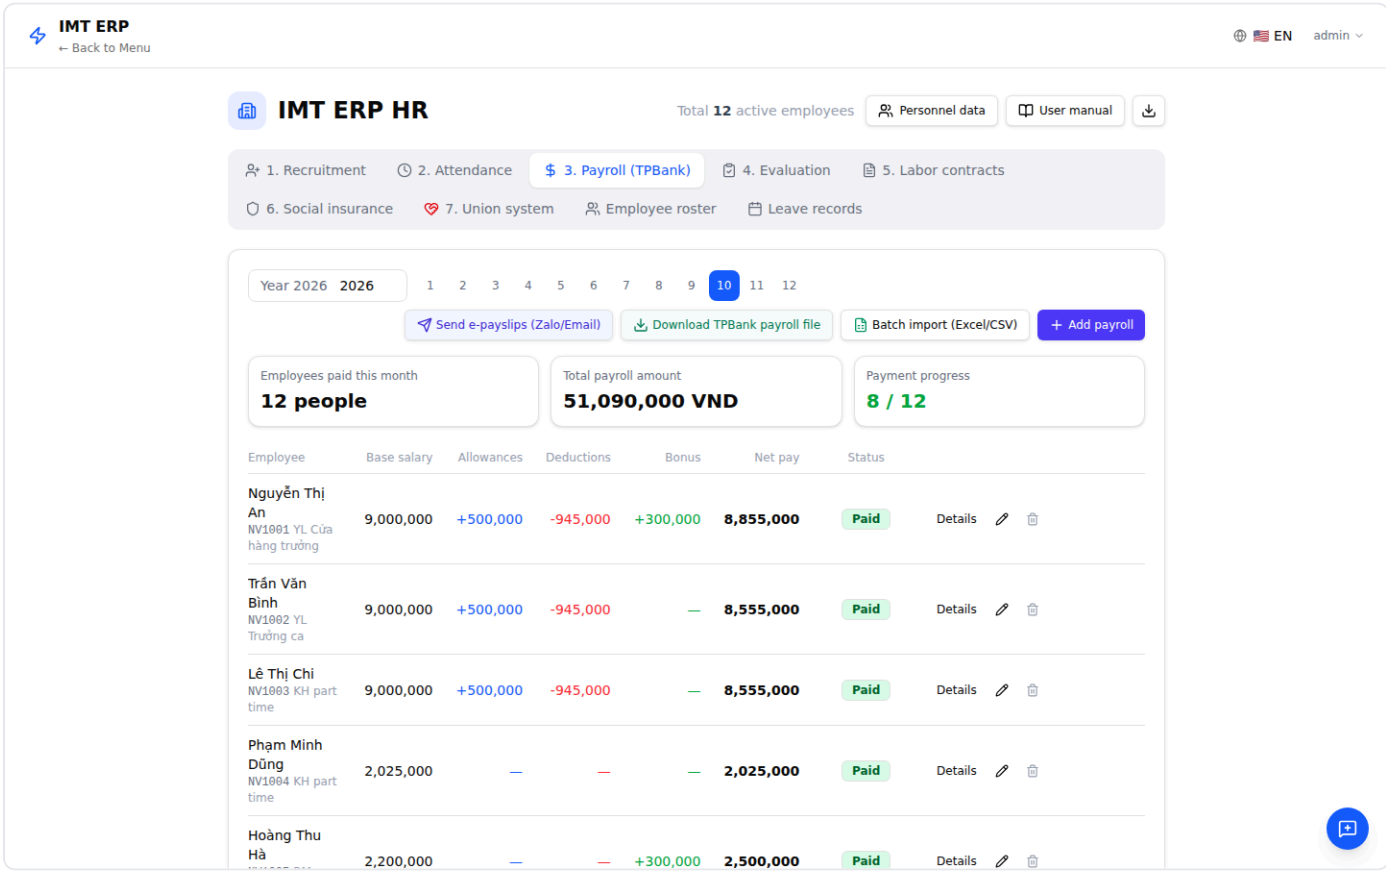

"Personnel Data" at the top right, or /personnel, lists every applicant and employee and whether their documents are complete (e.g. Missing 2/8). Open a person to see their details, the document list (uploaded file, paper original / copy received), pay and labor contracts. "Send Missing Doc Reminder" notifies everyone with incomplete documents.

2. Attendance

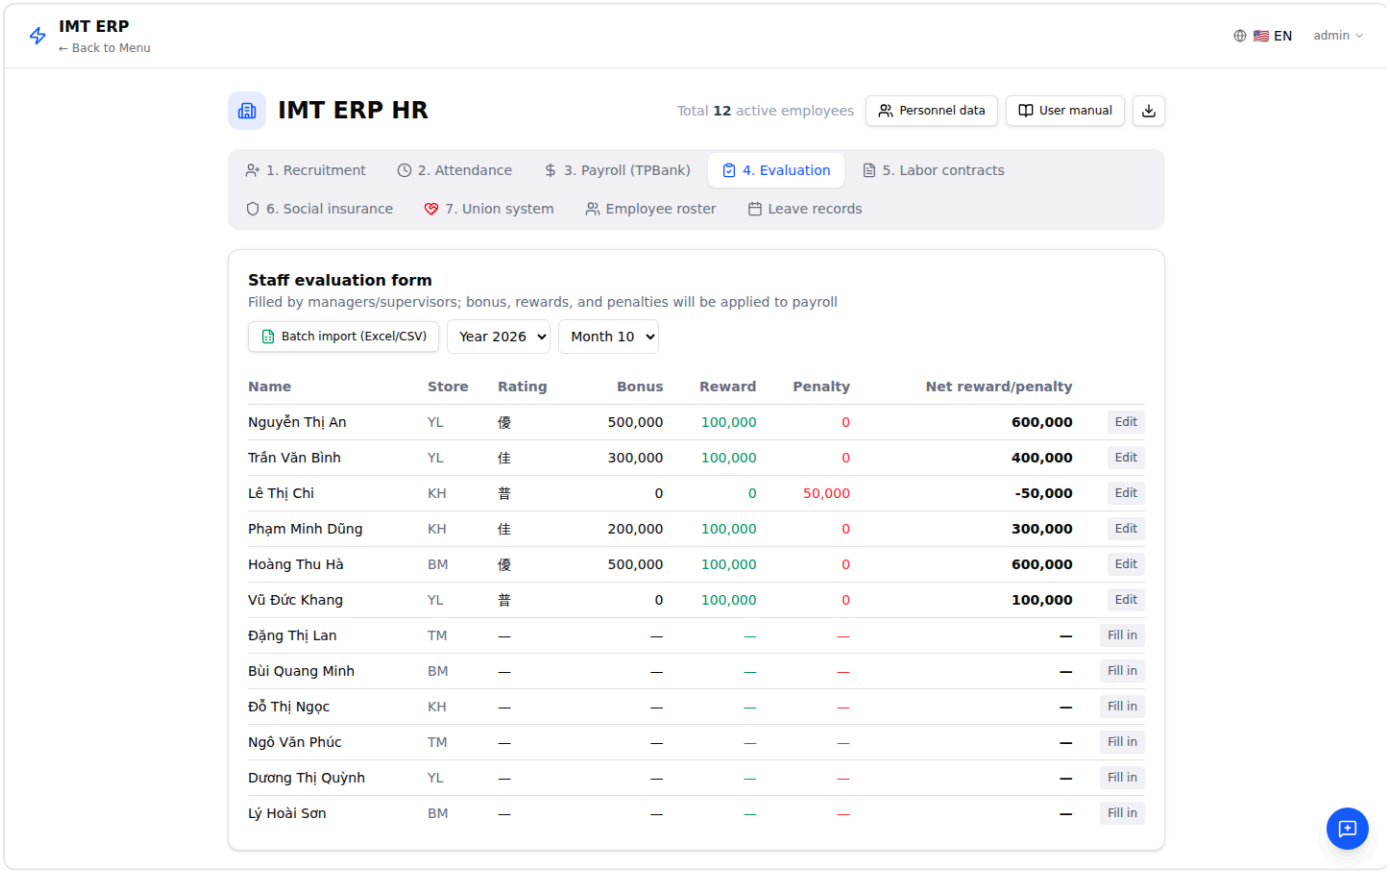

1. Choose the year and month, enter the store code (same as in the employee record, e.g. YL) and upload that store's time-clock export (.xls) for the month. Use one file per store.
2. The system totals each person's days and machine hours for the month.
3. For missed punches, enter hours in the adjustment column with a note; total = machine hours + adjustment. Re-uploading the same month only updates machine hours; manual adjustments are kept.

3. Payroll (TPBank)

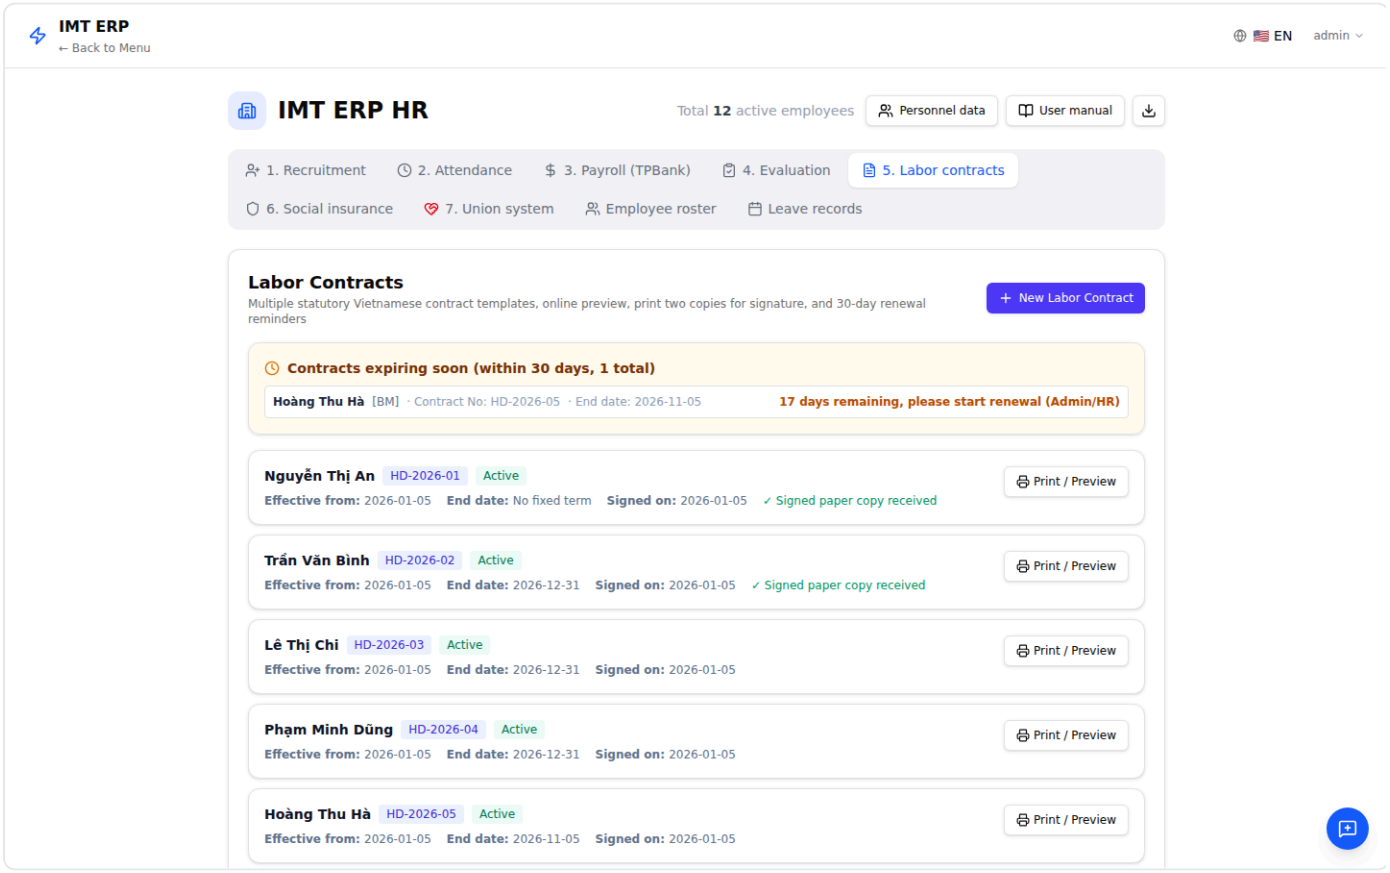

1. Choose the year and month; the top shows headcount, total payroll and payment progress.
2. Each row is one employee: base pay, allowances, deductions, bonus and net pay. Open the details for every payroll column; the pencil edits a row.
3. "Batch import" uploads the accounting payroll sheet; "Add payroll" adds one record by hand.
4. "Send e-payslips (Zalo/Email)" sends each employee their private payslip for the month; they open it in the employee portal and confirm receipt online.
5. "Download TPBank payroll file" creates the TPBank corporate banking bulk-transfer file.

4. Evaluation

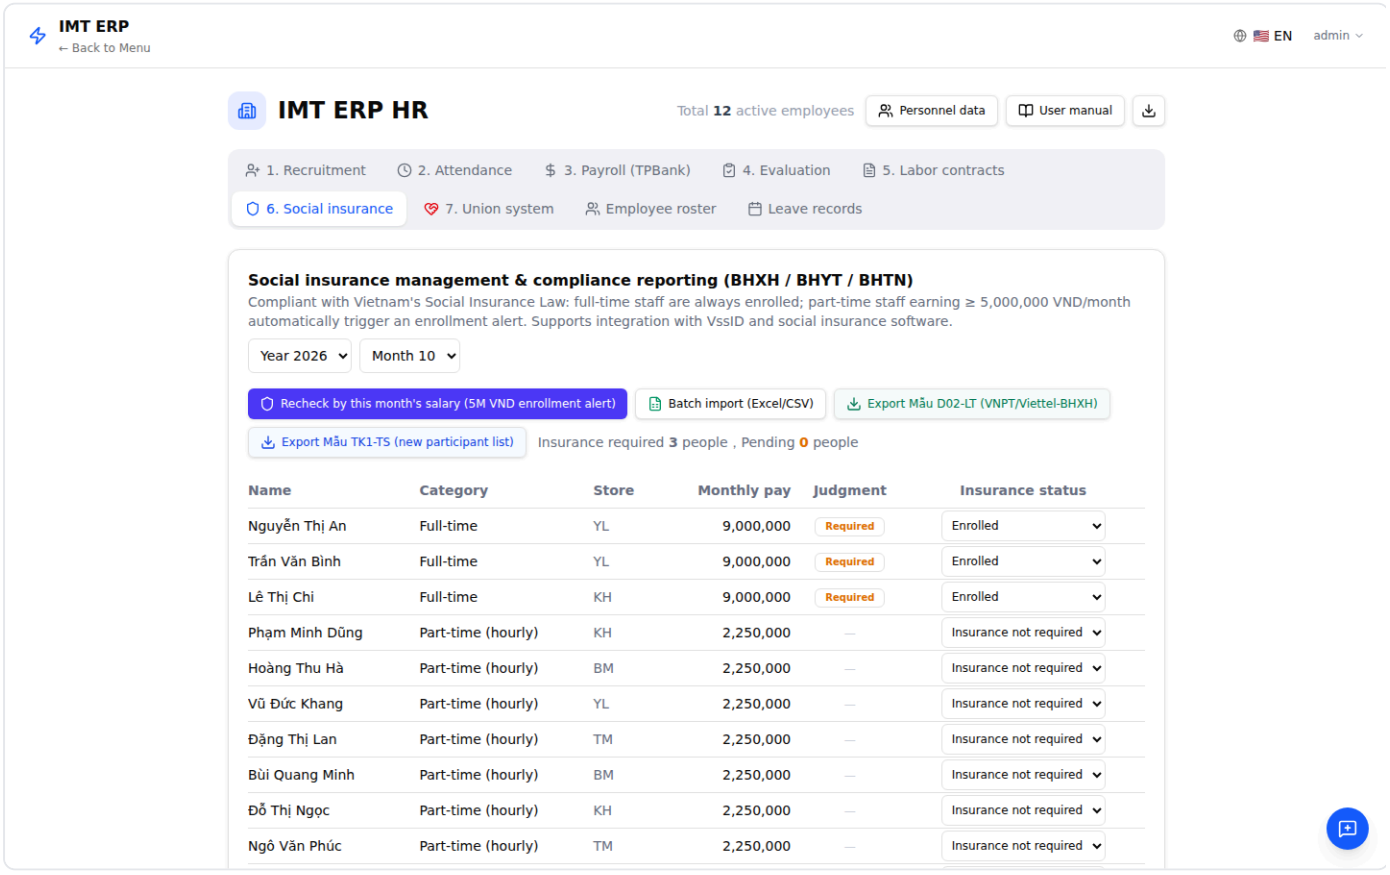

Choose the year and month, then click "Fill in" or "Edit" for an employee to enter the rating (優 excellent / 佳 good / 普 average / 待改進 needs improvement), bonus, reward and penalty items, comments and the evaluator. Net = bonus + rewards − penalties and is carried into payroll. The "Staff evaluation" tab on the store shift page uses the same data; store managers and leaders can only evaluate staff of their own store.

5. Labor contracts

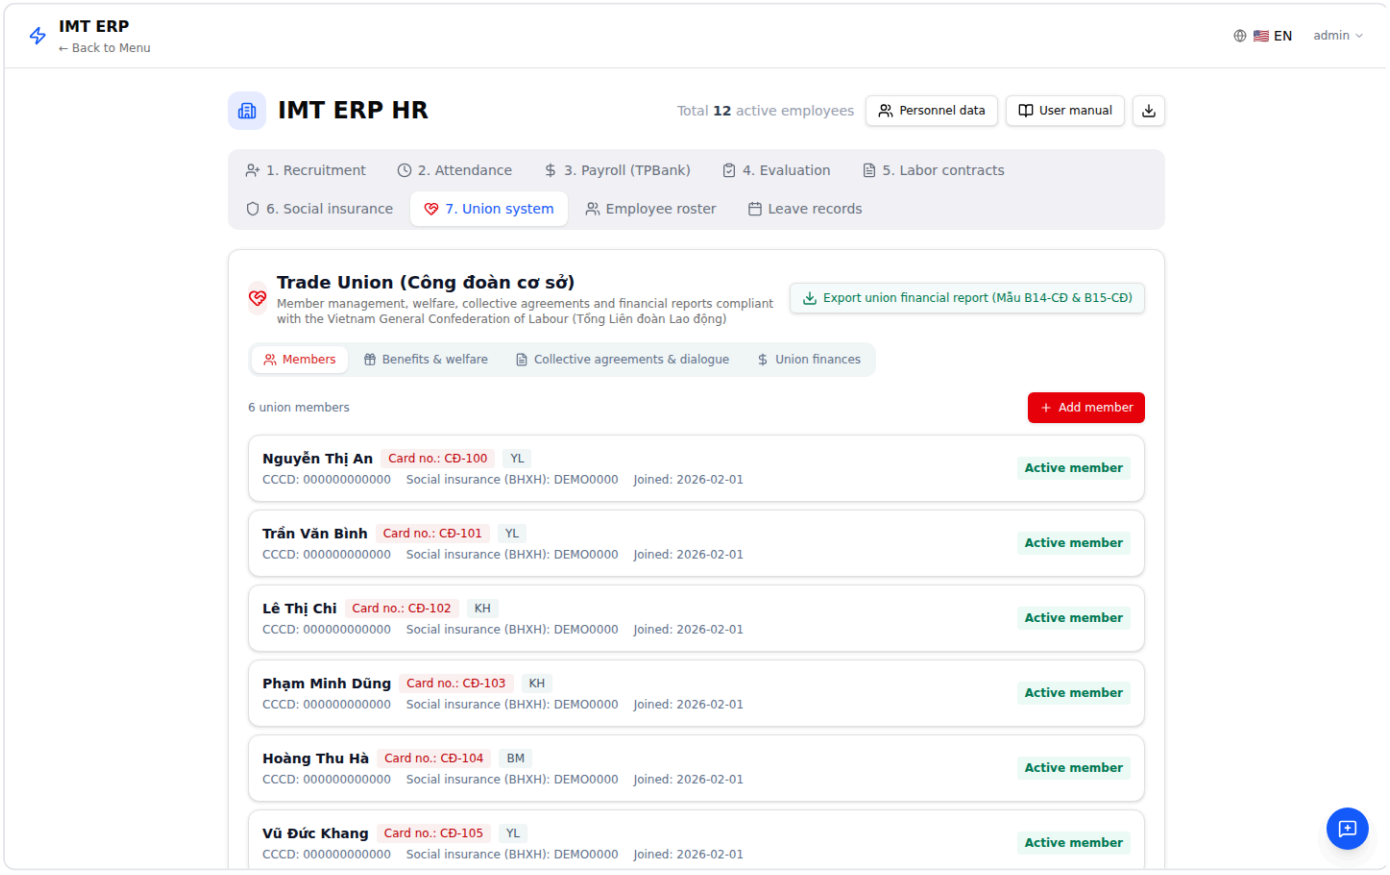

1. "New Labor Contract": choose the employee and the template (seasonal, one-year, indefinite, probation), preview the bilingual Chinese–Vietnamese contract, then confirm to create and file it.
2. Each contract shows its number, start, end and signing dates and whether the signed paper copy is back; "Print / Preview" prints two paper copies for signing.
3. Contracts ending within 30 days appear in the renewal reminder at the top so HR or Affairs can start the renewal.

6. Social insurance

1. Under Vietnam's Social Insurance Law, full-time staff are always enrolled; part-time staff are flagged when the month's pay is ≥ 5,000,000 VND. How part-time staff are judged can be changed under "Insurance settings" in the employee roster.
2. Each row shows category, store, monthly pay, the result (enrollment needed) and the status, which can be changed directly (Insurance not required / Pending enrollment / Enrolled).
3. "Recheck by this month's salary" recalculates and notifies HR; "Export Mẫu D02-LT" and "Export Mẫu TK1-TS" create the insurance report and the new participant list; "Batch import" updates insurance data.

7. Union system

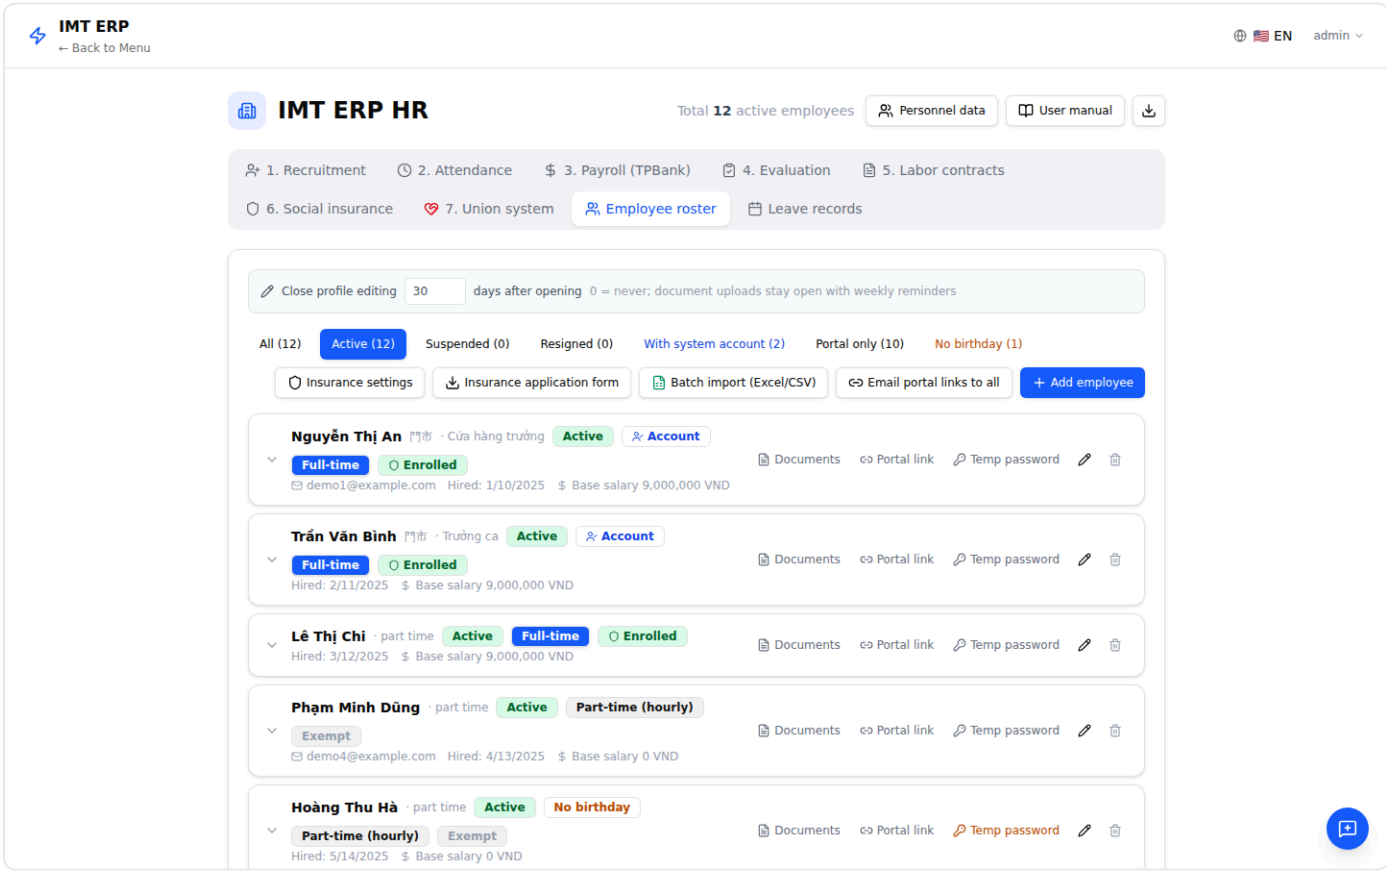

The union system follows the Vietnam General Confederation of Labour rules and has four sub-pages:

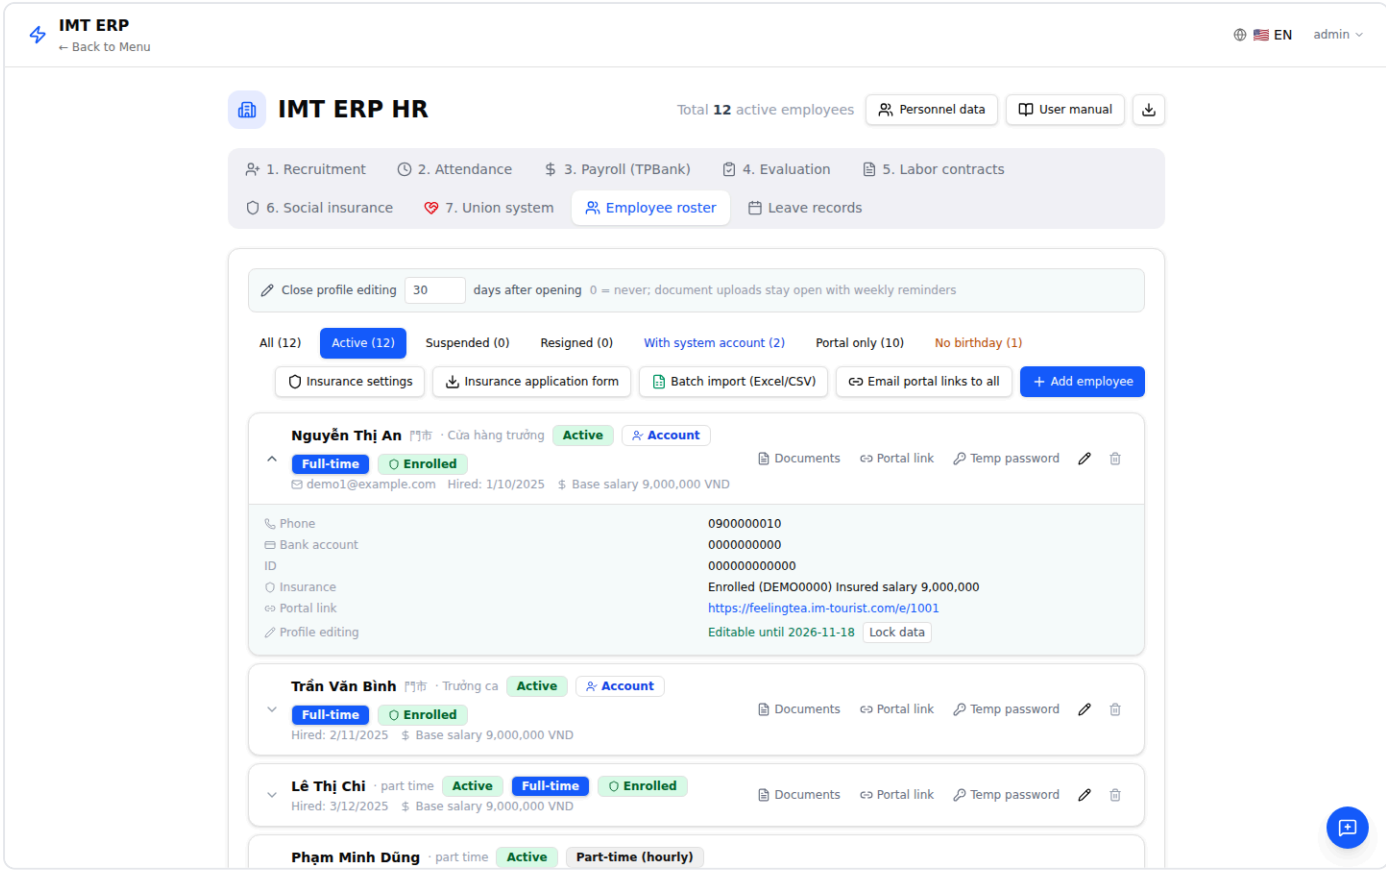

1. Member records: union card number, CCCD, social insurance number, join date and store.
2. Benefits and visits: birthday, marriage, maternity, hospital and relief requests with amounts.
3. Collective agreements and dialogue: meeting minutes and documents.
4. Union finances: income, expenses, balance and voucher numbers.

The export button at the top right creates the Mẫu B14-CĐ and B15-CĐ financial reports.

Employee roster

1. Filters at the top: all, active, inactive, resigned, plus "With system account", "Portal only" and "No birthday".
2. Tags on each employee: status, "Account" (only when linked; hover to see the account), "No birthday", full-time / part-time and insurance status.
3. Buttons on the right: documents, portal link, temp password, edit, delete.
4. Toolbar: insurance settings, insurance application form, batch import, email portal links to all, add employee.
5. At the top, "Close profile editing N days after opening" (0 = never). Document uploads are never closed; missing documents get a weekly reminder with the upload link.

Click the arrow on the left to show phone, bank account, ID, insurance and the portal link. Employees without an attendance number have no portal link. The expanded row also shows "Profile editing" (editable until a date, or locked) with a button to lock or unlock it.

Adding and editing an employee

Name *
Nguyễn Thị An

Department
門市

Position
Cửa hàng trưởng

Category *
Full-time

Employment type
Full-time

Email
demo1@example.com

Phone
0900000010

Hire date
01/10/2025

Base salary (monthly)
9000000

Hourly rate
0

Store
YL · Yên Lãng

Attendance ID
1001

Accounting ID
NV1001

Bank account
0000000000

Receiving bank
TPBank

ID number
000000000000

Birthday
01/15/1990

Employment status
Active

Units (multiple allowed)

HR | Finance & Admin | R&D | Store Operations | Store Leader | Affairs & Licenses | Audit | Marketing | Maintenance | Executive Office

☑ System account sees only this store (tick for store managers and leaders; untick for area supervisors)

Managed stores (multiple)

YL · Yên Lãng | KH · Khương Hạ | BM · Bạch Mai | TM · Tân Mai

The account can only work on the selected stores (shifts, evaluations, reports); if none selected, its own store YL

System account
Nguyễn Thị An (store.yl@example.com)

Once linked, the account's unit permissions and store lock follow this record. Only store managers, leaders and office staff need a system account; every employee can log in to the employee portal with their attendance number.

☑ Insurance required (Suggested: required Full-time staff enroll immediately)

Insurance status
Enrolled

Insurance number
DEMO0000

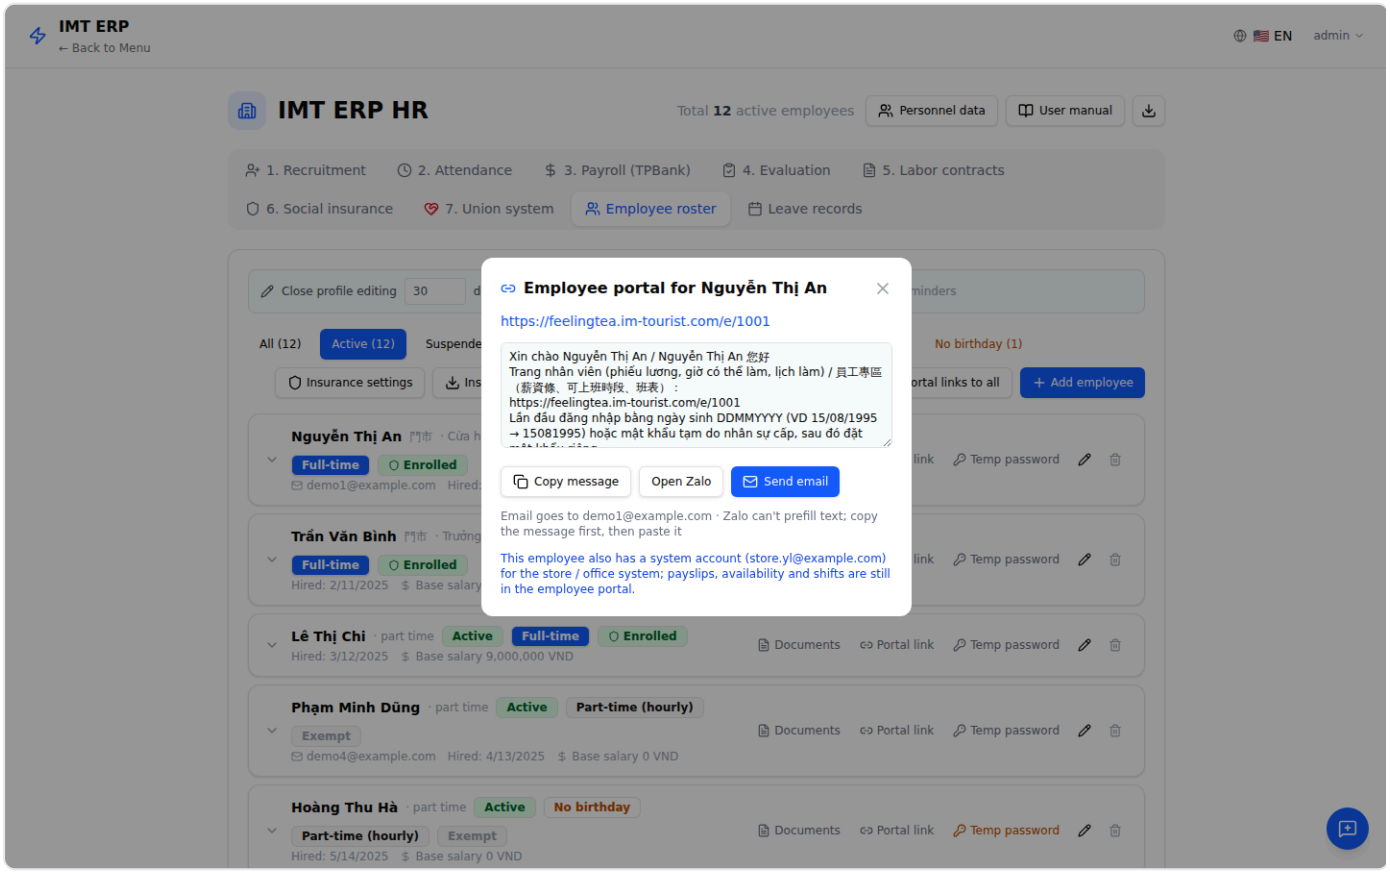

Insured salary
9000000

Cancel | ✓ Save

1. Details: name, category (full-time / part-time), employment type, phone, email, start date, monthly or hourly pay, store (dropdown), attendance number (= the portal login number), accounting code, bank, ID, birthday and status. "Category" decides how scheduling works in the portal: part-time staff enter available hours, full-time staff pick preferred days off. "Store" decides which store's schedule the person belongs to; if it is empty but managed stores are ticked, the first managed store is used.
2. Units (multiple allowed): which functions the person can use after logging in, for example Store Operations, Store Leader (shifts and evaluation only), HR, Finance & Admin.
3. "System account sees only this store": tick for store managers and leaders; leave unticked for area supervisors.
4. Managed stores (multiple): tick when a manager runs two stores; the account can only work on the ticked stores, or on their own store if none is ticked.
5. System account: only store managers, leaders and office staff need one. Once linked, the account's units and stores follow this record. Regular staff don't need an account and log in to the employee portal with their attendance number.
6. Insurance: tick whether enrollment is needed and enter status, number and insured salary; the system suggests based on category and pay.
7. The attendance number may contain digits only and must be unique; hiring a candidate assigns the next number automatically. Changing it changes the portal link too: after saving, the portal-link dialog opens so you can resend it, and the old link redirects to the new one.

Portal links and temporary passwords

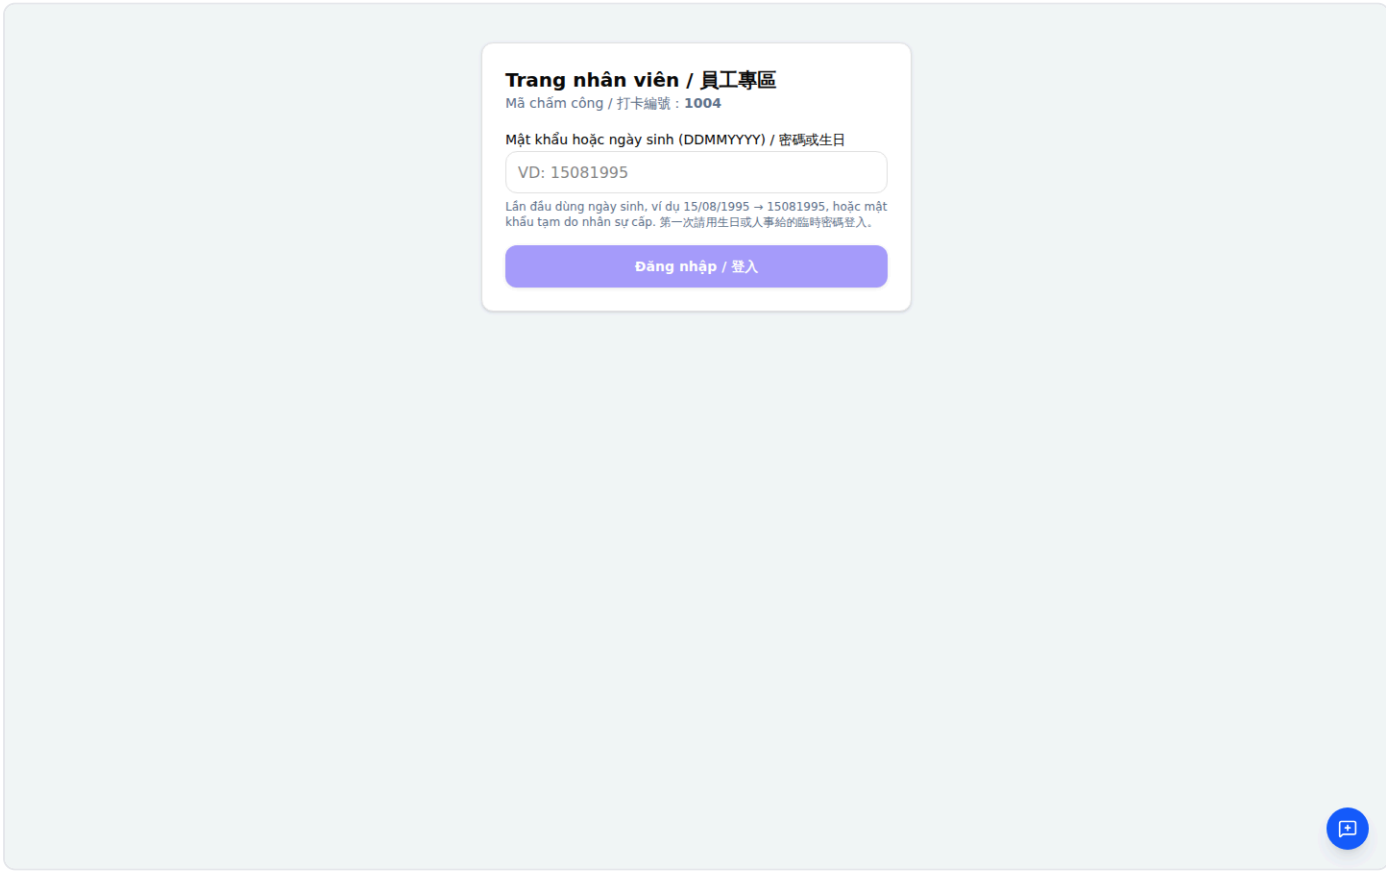

1. Click an employee's "Portal link" to see the link and a bilingual Vietnamese–Chinese message (what it is for and how to log in the first time).
2. "Copy message" and paste it into Zalo or another chat app; "Open Zalo" opens a chat by phone number (Zalo can't prefill text, so paste it); "Send email" emails the employee.
3. Employees without a birthday get a reminder to issue a temporary password too; employees with a system account get a note that their payslips and shifts are still in the employee portal.
4. "Email portal links to all" on the toolbar emails every active employee with an attendance number and an email; for the rest, copy the message or use Zalo.

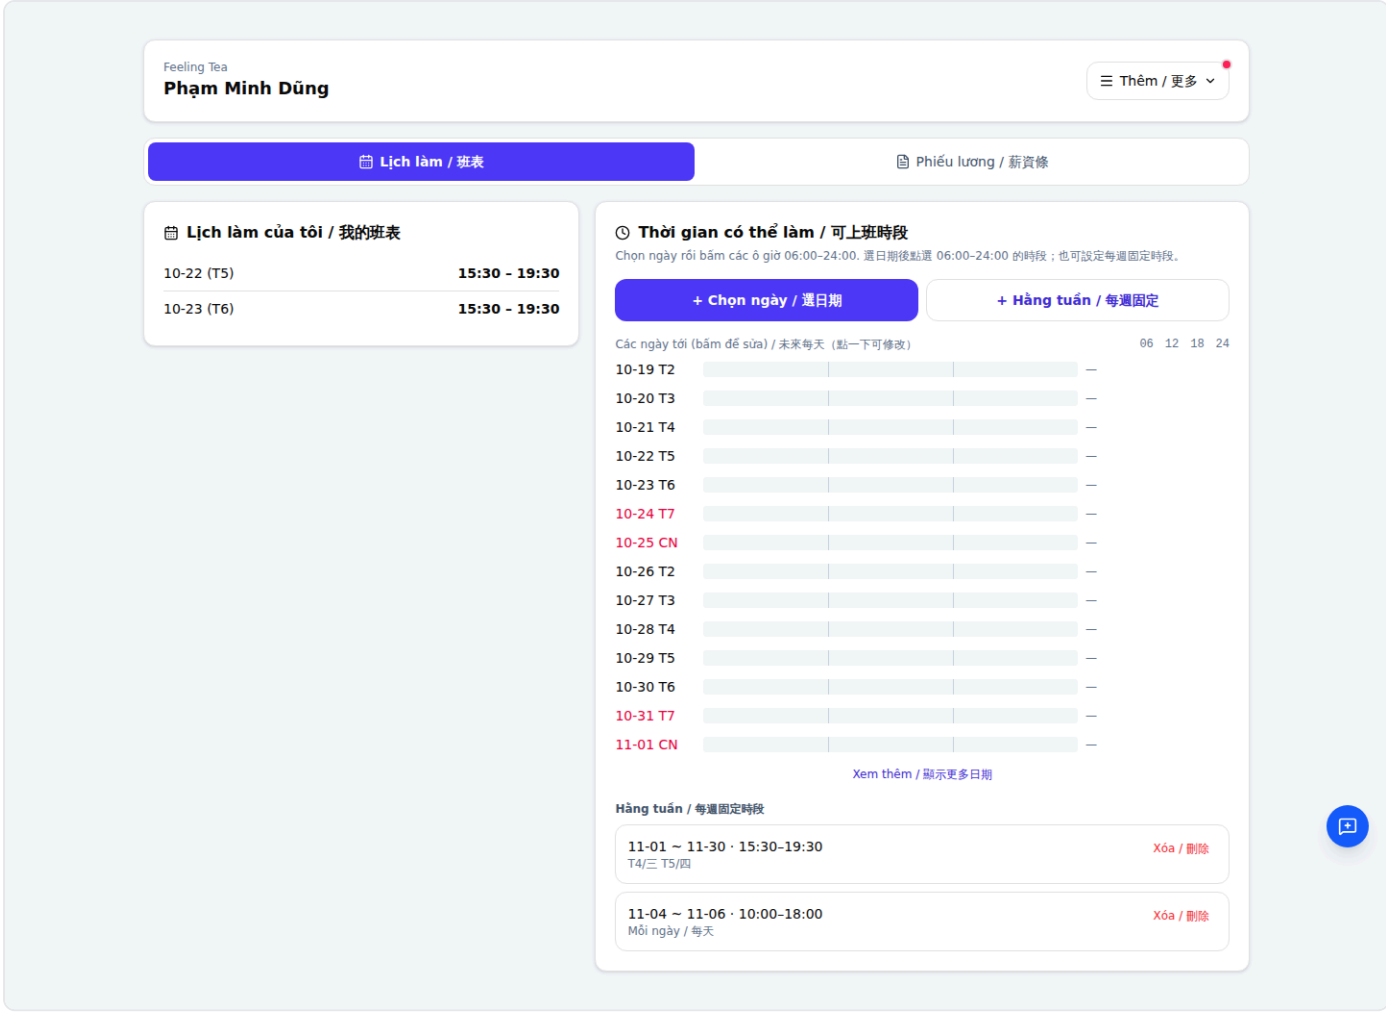

"Temp password" creates an 8-digit password that is shown only once. The employee's old password stops working and any lock is cleared; after logging in with it they must set their own password. Use it for employees without a birthday or who forgot their password.

Employee portal (what staff see)

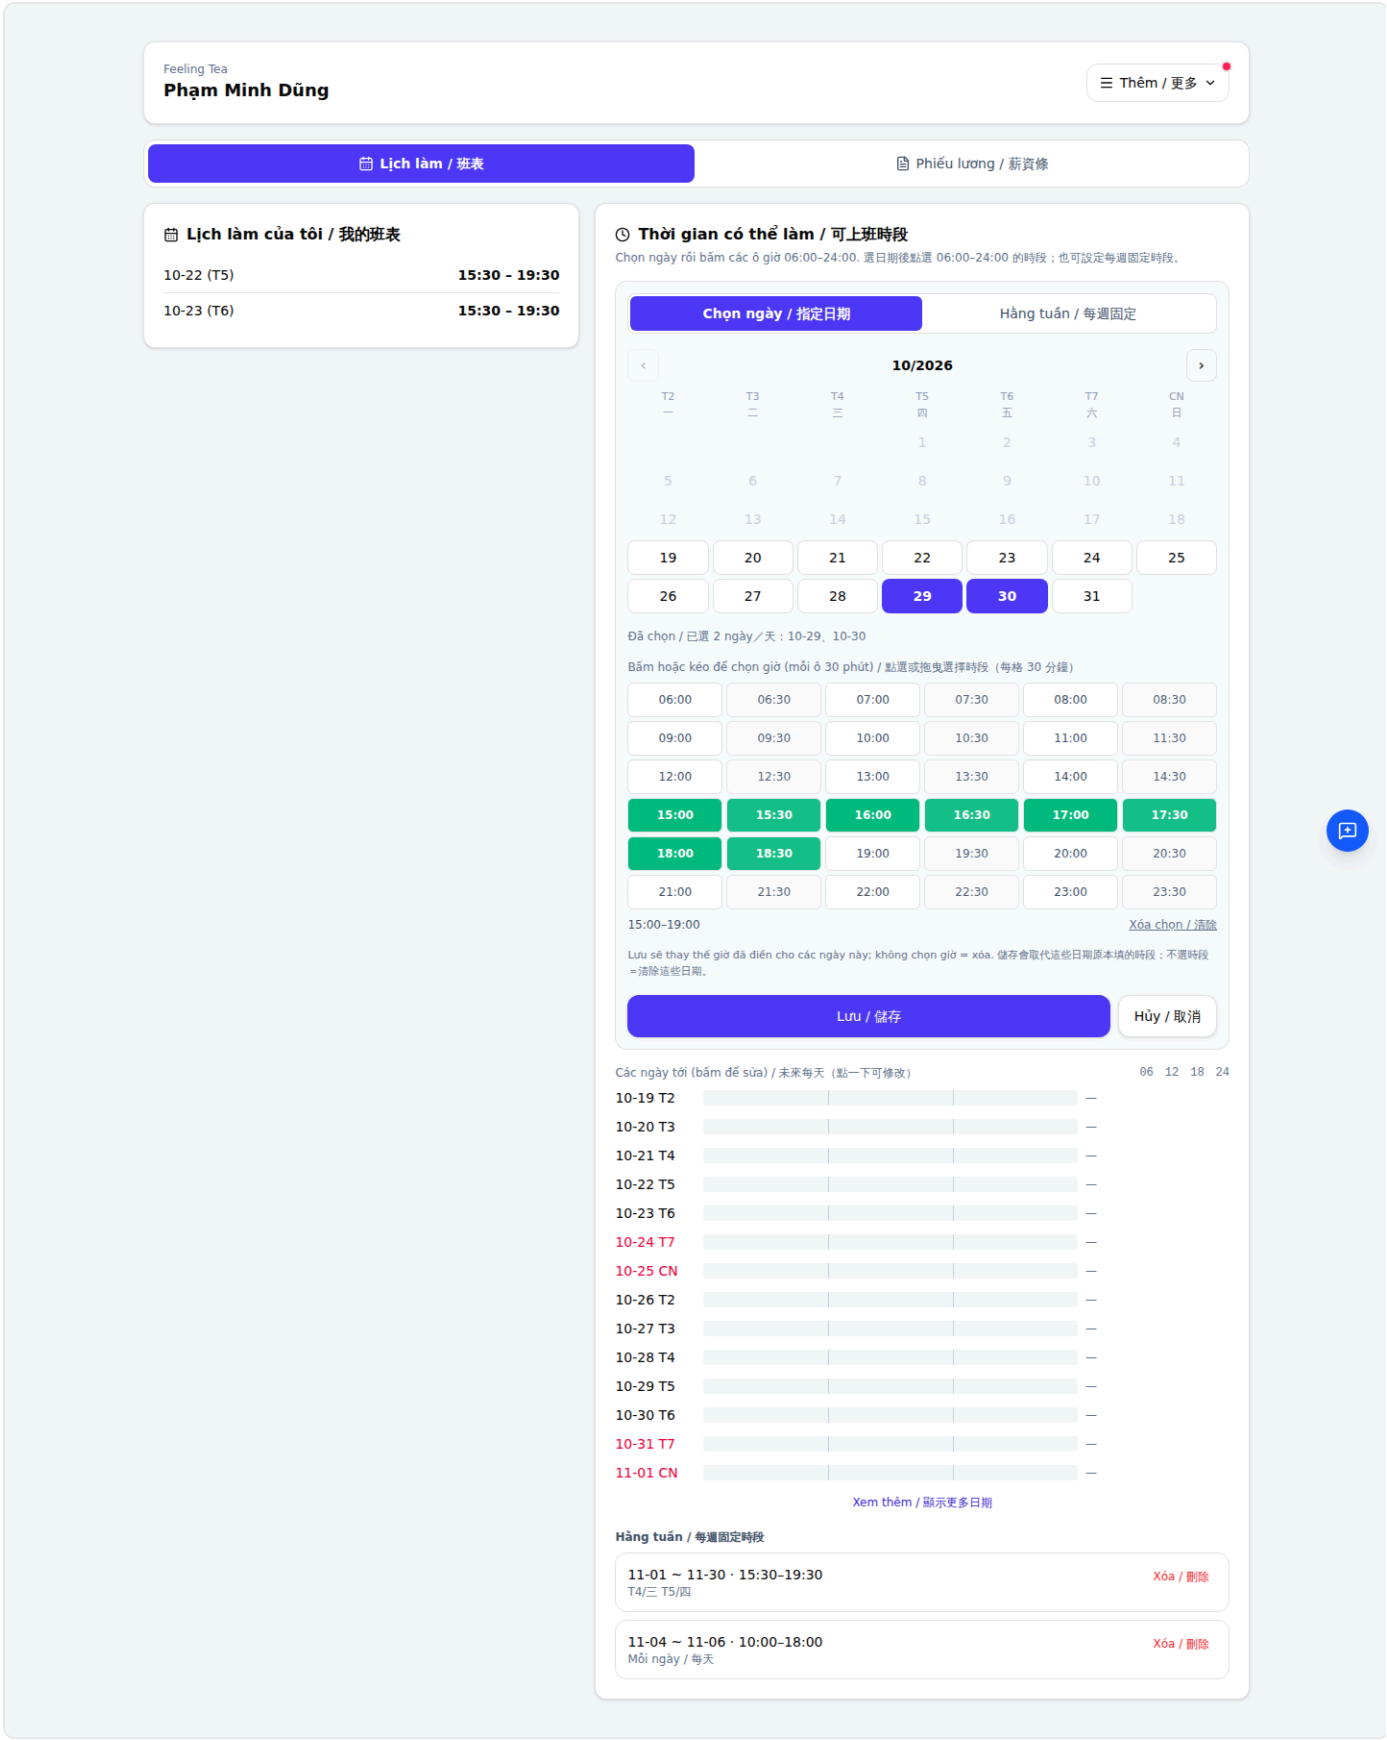

Staff open their own link and sign in with their birthday (e.g. 15/08/1995 → 15081995), a temporary password or their own password. After the first sign-in they must set their own password (at least 6 characters). Five wrong attempts lock sign-in for 15 minutes.

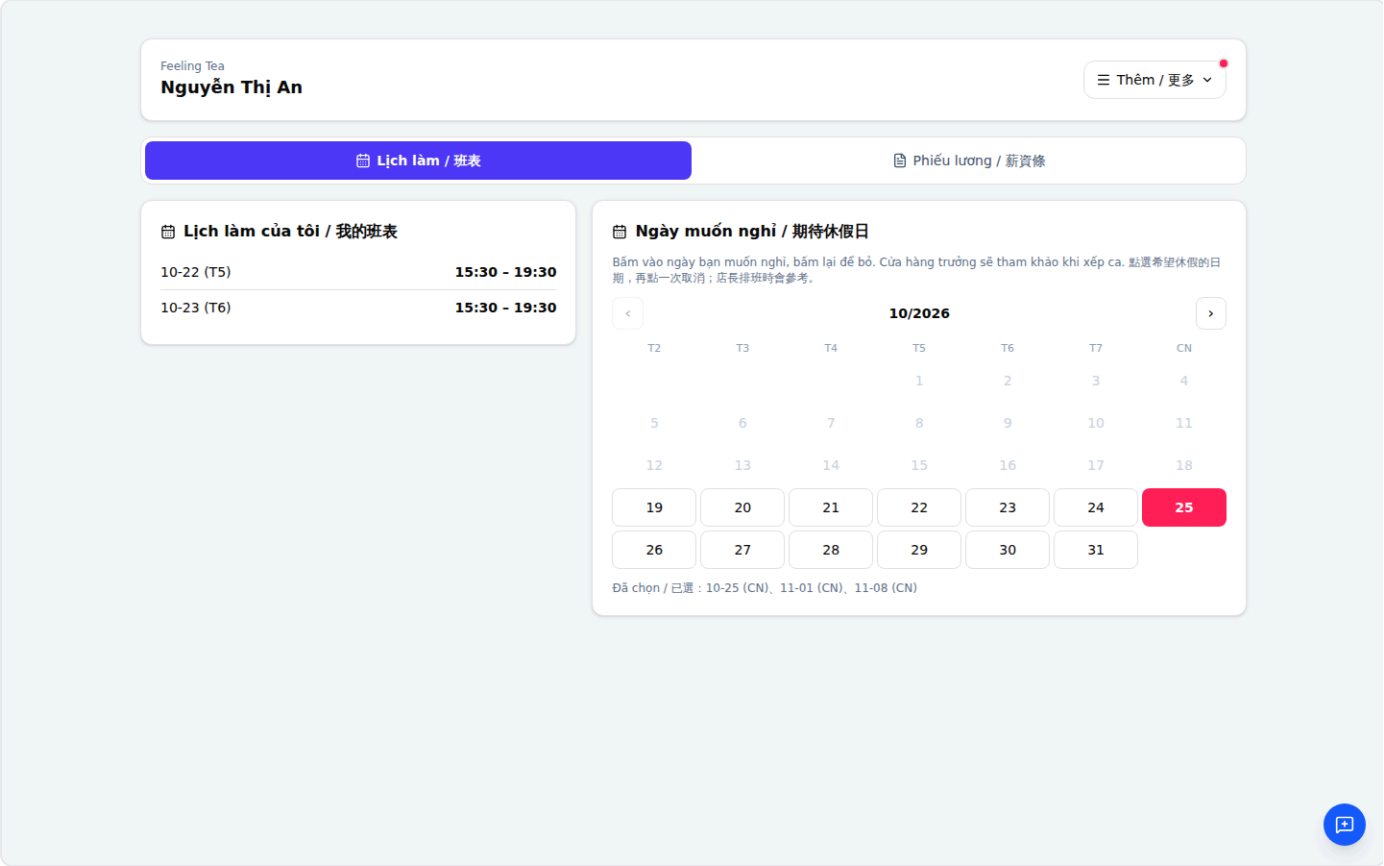

Layout after signing in:

1. The everyday pages are two tabs at the top: "Schedule" (default) and "Payslips".
2. The Schedule tab shows "My schedule" (shifts published by the manager) on the left and, on the right, "Available times" for part-timers or "Preferred days off" for full-timers. On phones they stack.
3. Less-used items are in the "More" menu at the top right: My resume, HR documents, Change password, Sign out. A red dot and a count show when documents are missing.

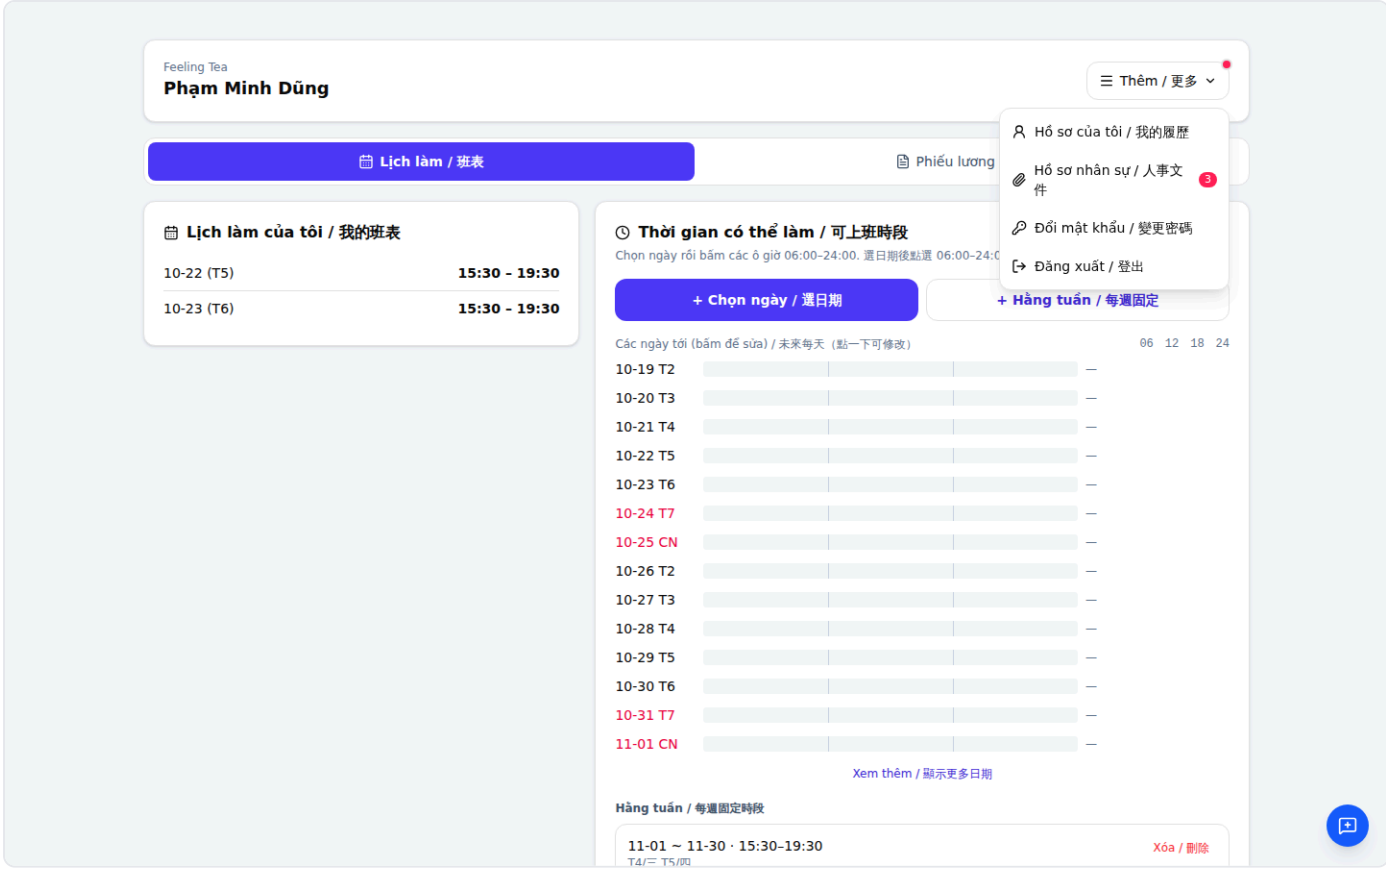

Part-timers — available times:

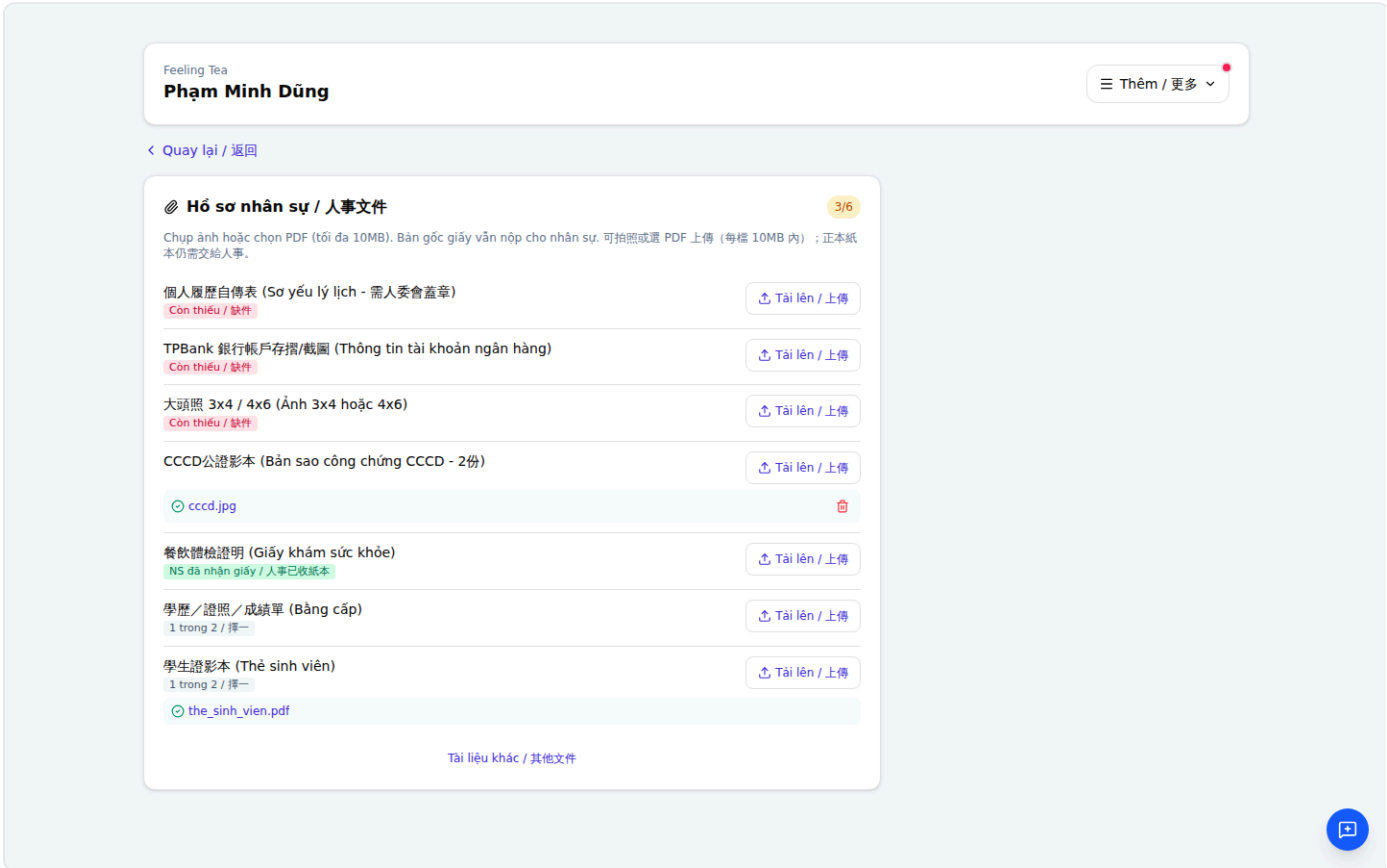

1. "Pick dates": tap one or more days on the calendar, then tap or drag the half-hour cells from 06:00 to 24:00 and save. Saving replaces what was entered for those dates; saving with no cells clears them.
2. "Weekly": enter a date range and weekdays (none = every day), then pick the cells, e.g. 1–30 Nov, every Wed and Thu, 15:30–19:30.
3. "Upcoming days" shows each day's available hours as green bars; tap a day to edit it. Weekly rules are listed at the bottom and can be deleted.

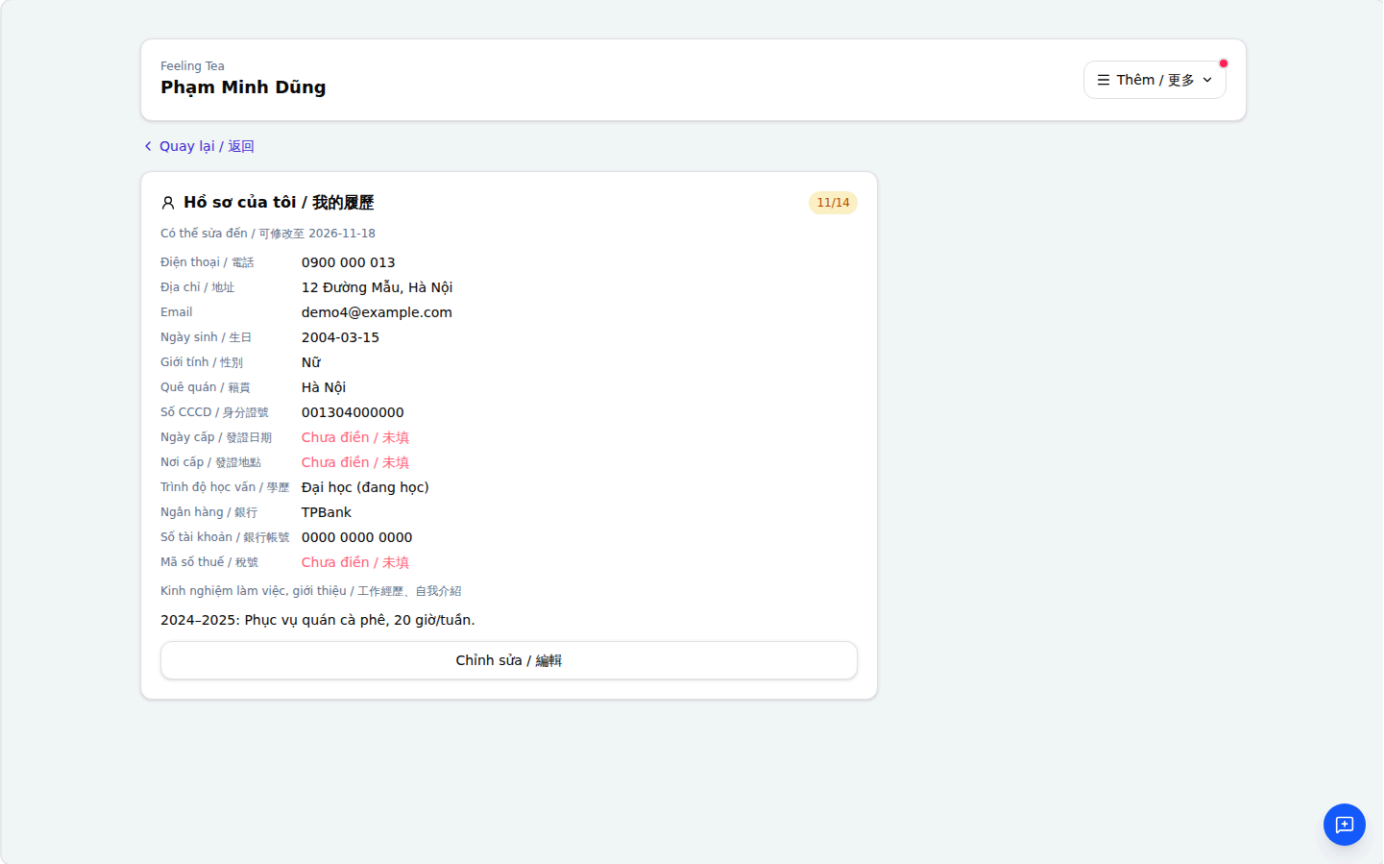

Full-timers — preferred days off: tap the days they would like off (up to about 3 months ahead); tap again to cancel. Managers see them as "day off requested" and AI suggestions avoid them.

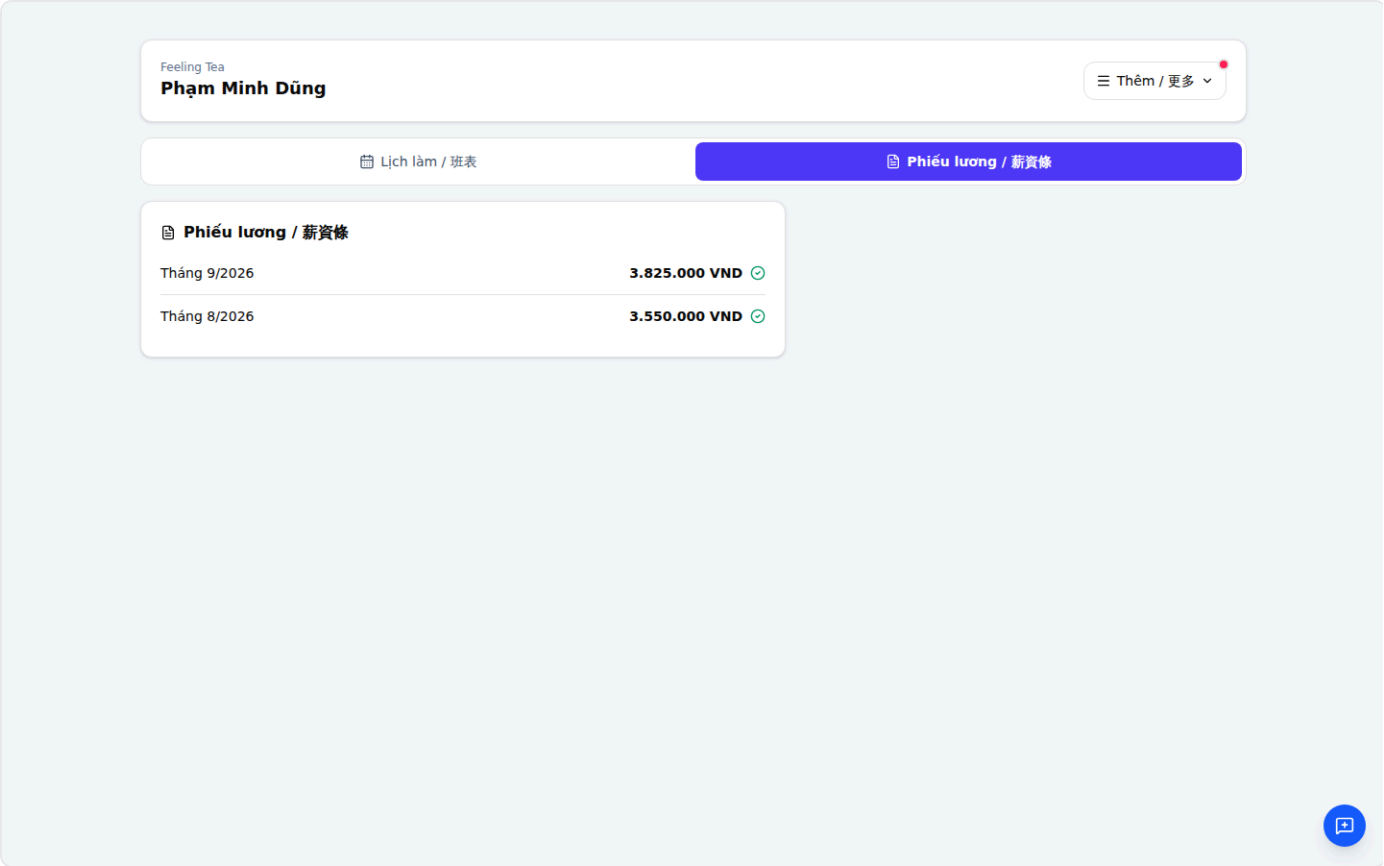

The "More" menu.

HR documents: each document shows "Missing", "1 of 2" or "HR received paper". Staff can take a photo or choose a PDF (up to 10MB each) and delete their own upload within 24 hours; after that, ask HR. Original paper copies still go to HR.

My resume: phone, address and notification channel can always be changed; email, birthday, ID, bank, tax code, gender, hometown, education and work experience can be changed while editing is open, and become read-only once HR locks it or it expires. Changes to bank, tax code, ID or birthday notify HR.

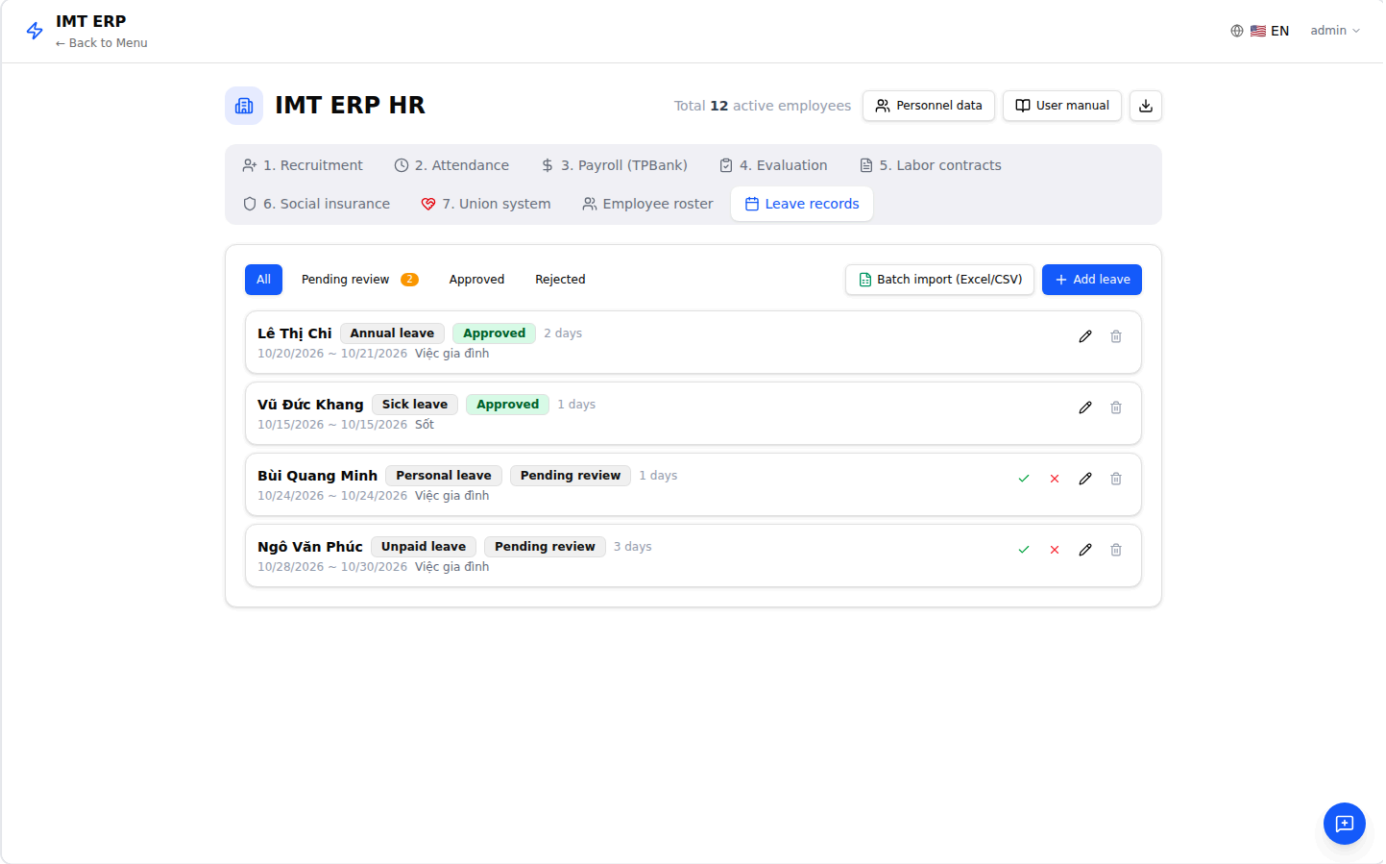

Payslips: monthly net pay; open one to confirm receipt online (green tick = confirmed).

On phones the tabs and menu are the same and the Schedule tab stacks vertically.

If no store is set for the employee, the portal asks them to contact HR and they cannot enter available times or days off.

Leave records

Switch between all, pending review, approved and rejected at the top. For pending requests click ✓ to approve or ✕ to reject; the pencil edits and the bin deletes. "Add leave" takes the employee, leave type (annual, sick, personal, maternity, paternity, unpaid, other), dates, number of days and reason; "Batch import" imports many at once.

FAQ and notes

The portal doesn't show available hours or days off? Check that the employee record has a store (or managed stores) and the right category: part-time staff see available hours, full-time staff see preferred days off.

An employee can't open the employee portal? Check that they are active and have an attendance number. Employees without a birthday can't log in with it the first time: add the birthday in the roster or issue a temporary password. Too many wrong attempts lock the login for 15 minutes.

An employee forgot their password? Click "Temp password" in the roster to issue a new one; the old password stops working.

Does every employee need a system account? No. Only store managers, leaders and office staff need one; regular staff use only the portal link.

A store manager runs two stores? Tick "Store Operations" or "Store Leader" in the employee record, tick both stores under "Managed stores" and link their system account.

Attendance hours look wrong after upload? Check the store code entered when uploading and use one file per store; use the adjustment column for missed punches.

Can a system account be taken back and given to someone else? Yes. Edit the employee who left, clear "System account" and save; then edit the new person, choose the account and save (one account can only be linked to one employee at a time). The sign-in password does not change automatically: reset it with "Forgot password" on the sign-in page (the email goes to the account's address). For role accounts such as store managers, use a company or store mailbox so you only need to reset the password and relink. The account's past activity stays with the same account.

If I change an attendance number, does the old portal link still work? Yes, it redirects to the new number, and after saving the system reminds you to resend the new link.
